DEPUTY SPEAKER (Mr. R.J. Simpson): Welcome back, everyone. Item 2, Ministers’ statements. Minister of Education, Culture and Employment.

Ministers’ Statements

MINISTER’S STATEMENT 152-18(3):
PROGRESS IN POST-SECONDARY EDUCATION

HON. CAROLINE COCHRANE: Mr. Speaker, we are making significant progress in meeting this government’s mandate commitments to strengthen the Northwest Territories post-secondary education system.

I am pleased to advise that the drafting of legislation to govern post-secondary education in the Northwest Territories is nearing completion. The proposed legislation will create, for the very first time, a process to ensure the effective governance and quality assurance of all post-secondary institutions operating in the territory.

This fulfills our mandate commitment to develop legislation ensuring a quality assurance system by which post-secondary institutions will be recognized in the Northwest Territories. This also contributes to our mandate commitment to develop and foster our knowledge economy. The Department of Education, Culture and Employment continues to work with our post-secondary partners to support the development and growth of post-secondary institutions and programs in the Northwest Territories. The proposed legislation will also support Aurora College’s transformation into a polytechnic university, including the creation of a new governance model and its own degree-level programs.

Mr. Speaker, we have a great opportunity to transform post-secondary education for the long term. This will provide opportunities here in the territory for residents to get the skills and training they need for NWT jobs today and in the future.

A polytechnic university combines the practical approach of a college education and the depth of study usually associated with a university program. Polytechnic programs are skills-intensive, technology-based, and hands-on, providing students with practical training for in-demand jobs. Program and curriculum decisions at polytechnic universities are also made in close collaboration with representatives from industry, ensuring graduates achieve skills that are relevant to the current job market.

Since tabling the Government Response to the Aurora College Foundational Review, I have travelled to the three campus communities of Inuvik, Fort Smith, and Yellowknife. I have met with Indigenous and community leaders, Aurora College staff, more than 100 college students, and more than 200 members of the public in the three communities.

Mr. Speaker, there is overall excitement for the transformation of Aurora College. The mayors of all three campus communities have sent a joint letter confirming their collective support of the polytechnic university and recognizing the academic, social, and economic advantages it will provide for all Northerners.

A polytechnic university with three vibrant campuses and 21 community learning centres will give residents access to more educational options closer to home. It will improve employment success for residents, help close skill gaps for in-demand jobs, and better respond to employer, industry, and community needs in the Northwest Territories. It creates a platform to grow our knowledge economy, including increased retention of research funding and increased influence over Northern research priorities.

The new $10-million Aurora College Centre for Mine and Industry Training in Fort Smith and the planned Arts, Crafts and Technology Centre in Inuvik are two examples of what we can achieve through strategic partnerships with governments and industry. The Government of the Northwest Territories has been and remains committed to investing in post-secondary education for Northerners, but we must be making strategic and informed decisions as we move forward.
Mr. Speaker, we know the next steps for 2019, and we remain on track to meet our long-term goal of a polytechnic university. It is critical that we get this right by making decisions in the right order and at the right time. The strengthening and growth of our post-secondary education system must begin with a clear vision and a strong associate deputy minister to lead Aurora College and oversee the design and implementation of changes over the coming months and years. I am pleased to welcome, starting on March 4, Dr. Tom Weegar as our new associate deputy minister of post-secondary education renewal.

That vision will be informed by the people of the Northwest Territories. All residents will have the opportunity to provide their thoughts and ideas on the strengths, challenges, and opportunities in our post-secondary education system. This input will be used to define the territorial vision and goals for the future and guide the development of a post-secondary education framework. The framework will provide a clear picture on what we will achieve and how we will work together with our stakeholders and partners.

Our next step is to establish the advisory committee and academic advisory council to bring together experts from across the territory and the country to ensure we follow national standards and best practices in all areas.

Mr. Speaker, there is a great deal of work ahead, but the opportunities we create will generate wide-ranging social and economic benefits and greatly advance what we can achieve as a territory. Mahsi cho, Mr. Speaker.

DEPUTY SPEAKER: Masi. Ministers’ statements. Minister of Municipal and Community Affairs.

MINISTER’S STATEMENT 153-18(3): COMMUNITY GOVERNMENT ELECTIONS

HON. ALFRED MOSES: Thank you, Mr. Speaker. Mr. Speaker, municipal elections were held in nine hamlet communities in the Northwest Territories on December 10, 2018. There were 71 candidates in total vying for 46 available seats. I am pleased with the large number of candidates as this indicates there is keen interest in local government and that individuals want to serve as leaders and decision-makers for their communities.

I am also pleased to report that through the elections held on December 10th, our territory continues to benefit from near gender parity at the local government level with 21 female candidates successfully securing their seats. In total, 41 percent of the 71 candidates for municipal office were female, and 46 percent of those candidates were successful in their bid for a seat.

The voter turnout rate was between 44 percent and 54 percent across the Territories. Thirty-nine percent of candidates for councillor positions were acclaimed. Acclamations occurred in the hamlets of Aklavik, Enterprise, Sachs Harbour, and Tuktoyaktuk.

Mr. Speaker, local elections remain important to community residents. Being an elected official is one of the best ways that an individual can support their community in providing a safe, sustainable, and healthy environment for their residents.

In addition to those elected in the October Municipal Taxation Authority elections acknowledged in this House in the fall, I congratulate all who were elected on December 10th. In particular, I wish to congratulate Mayor William Koe in Fort McPherson, Mayor Ray Ruben in Paulatuk, Mayor Floyd Lennie in Sachs Harbour, Mayor Danny Beaulieu in Fort Providence, and Mayor Laverna Klenenberg in Ulukhaktok. I look forward to working closely with each of these community leaders in their new capacity.

Many thanks to all the candidates who ran in the nine community elections. People’s willingness to serve is a critical component of democracy at all levels of government.

I would also like to thank the staff and volunteers who led the election process on behalf of their municipalities. It takes dedication and significant effort by many people to support this process behind the scenes so that residents can exercise their right to vote in elections.

Finally, Mr. Speaker, we will see 11 municipal elections held in 2019. There will be five mayor positions and 46 councillor positions available. This will be an opportunity for aspiring candidates in those communities to run for community leadership positions and for residents to choose their decision-makers. I encourage all qualified residents to put their names forward and, especially, to get out and vote. Thank you, Mr. Speaker.

Members’ Statements

MEMBER’S STATEMENT ON RECOGNITION OF INSPIRE AWARD WINNER MARY EFFIE SNOWSHOE

MR. BLAKE: Thank you, Mr. Speaker. Mr. Speaker, I would like to acknowledge Elder Mary Effie Snowshoe from Fort McPherson. Mary Effie was recently in Calgary to accept the Indspire Award for Culture, Heritage, and Spirituality.
Mr. Speaker, Indspire is a national Indigenous charity that focuses on the education of Indigenous people. Their vision is to enrich Canada through Indigenous education and by inspiring achievement.

Each year, Indspire presents the Indspire Awards, honouring success and achievement by Indigenous people. Indspire celebrates and recognizes First Nations, Inuit, and Metis individuals who contribute for the long-term benefit towards their family, community, and Canada.

Mr. Speaker, at 81 years old, Mary Effie Snowshoe grew up being taught the Gwich’in traditional way of life from her parents; hunting, fishing, trapping, preparing food, and tanning moose skin. Mary Effie continues to pass on her knowledge to family as well as to visitors to the community and visitors to her fish camp.

Up until 2003, Jijjuu Mary Effie taught the Gwich’in language for 24 years until she retired. “Retired” is not in her vocabulary, as she continues to help with traditional activities in the community and school, as well as play host to numerous traditional teachings at her fish camp.

Mr. Speaker, Mary Effie has a wealth of stories to share, each with a spiritual meaning. She is eager to take you by the hand to teach you on-the-land survival skills.

We are fortunate to have elders such as Mary Effie in our community. We have so much to learn, and we should take advantage and learn from our elders, such as a wise woman. Congratulations, Jijjuu Mary Effie Snowshoe. Mahsi, Mr. Speaker.

DEPUTY SPEAKER: Members’ statements. Member for Yellowknife North.

MEMBER’S STATEMENT ON INDIGENOUS EQUITY IN MINERALS INDUSTRY

MR. VANTHUYNE: Thank you, Mr. Speaker. What if I told you the next big business movement in the NWT, and it’s already happening, is that Indigenous organizations are going to become actual owners of mineral resource projects?

Mr. Speaker, relations between Indigenous Peoples and resource developers have been difficult in the past. A lack of respect for treaties and an often inconsiderate industry attitude toward First Peoples have strained relations, so it’s easy to understand the degree of mistrust about mineral resource projects.

However, in recent years, there has been an obvious change. Since the start of the diamond mines and the execution of impact benefit agreements, both sides increasingly understand that the real collaboration can be very profitable. Indigenous governments have formed economic development corporations that provide a multitude of services to the mines; human resources, catering, and camp services, to name a few. The Dene Nation took it a step further when the Denendeh Development Corporation created its own exploration and development company.

These past 20 years of doing business together has revealed a change in mindset. Reconciliation is the current priority between Indigenous Peoples and Canada, and that involves greater recognition of Indigenous rights and the abandonment of harmful policies. It will only truly be achieved, however, when Indigenous Peoples have the power to create their own economic freedom and decrease their dependence on government support.

Mr. Speaker, I believe the Indigenous people of the NWT have found the solution through building partnerships in resource development, but we’re about to see this go one step further to ownership.

Mr. Speaker, a key discussion at roundup this year was how Indigenous groups want to become involved in resource development, and what benefits they will derive. Equity ownership is the new partnership. The resulting wealth creation and prosperity will lead to economic empowerment and self-determination.

Mr. Speaker, it is time to acknowledge that Indigenous people want to improve their living standards and provide a better future for their children. Their socio-economic situation may remain difficult, but the NWT proves that Indigenous communities are reconciling economic development and empowerment while continuing to be respectful stewards of the land and the environment. There are many reasons to be optimistic about our economic future, Mr. Speaker, and Indigenous ownership in mineral resource development is one of them. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Members’ statements. Member for Sahtu.

MEMBER’S STATEMENT ON STRATEGIC INFRASTRUCTURE INVESTMENT

MR. MCNEELY: Thank you, Mr. Speaker. The NWT tourism is very much a thriving industry. This can be measured by the current surveys reflecting over the past several years on the incoming visitors and public and private sector investments.

Mr. Speaker, our continued support is needed in broadening our horizons to further provide destination options through infrastructure investments while reducing our living costs through
affordable travel on expanding our all season road systems. These strategic infrastructure investments enhance affordable connections by providing travellers with options in collaboration to sustaining our future’s non-Territorial Formula Funding, or TFF, revenues.

Mr. Speaker, this sector contributes 32 percent of our income. It is incumbent upon us as legislators of this government to demonstrate our mandate to advocate for the rights to GNWT boards should be timely, consistent and transparent.”

The Premier is accountable to the Executive Council for the implementation of this policy. Further guidance on appointments to boards include the following direction to “ensure that gender equity and local expertise in relation to mandate are considered when persons are appointed, nominated, or confirmed.” Lastly, the board policy states that the Cabinet may: “establish appointment guidelines and procedures for the selection and appointment of board members.”

In some cases, opportunities for board appointments or nominations are even made known to Regular MLAs. I am also of the view that the Premier must exercise some oversight on ministerial appointments, including those to boards and other appointments authorized by statutes. It is now time for Cabinet to develop a policy for ministerial appointments given the public concerns raised by the recent appointment of the Workers' Advisor. I will have questions later today for the Premier. Mahsi, Mr. Speaker.

DEPUTY SPEAKER: Members’ statement. Member for Yellowknife Centre.

MEMBER'S STATEMENT ON CHILD AND YOUTH ADVOCATE

MS. GREEN: Mahsi, Mr. Speaker. I rise today to revive a discussion started in the 14th Assembly about creating a child and youth advocate for the Northwest Territories. Children and youth need our special attention and support, particularly when they are being cared for by people other than their immediate families. Since the NWT started discussing this issue in 2003, Yukon has created an advocate office, and so has Nunavut. In fact, we are one of the only two jurisdictions in Canada without an office dedicated to protecting the rights of children on both an individual and systemic basis, as well as providing public awareness about those rights.

Mr. Speaker, Yukon has had a child and youth advocate office since 2010. The mission of the advocate in Yukon is to provide services to children and youth up to 18 years of age by protecting and asserting their rights and ensuring their voices are heard in a safe and supportive way. The office advocates for children who are receiving, or who are eligible to receive, government services, including help with mental health and addictions, education, and justice. The advocate is also involved in all aspects of child and family services. A total of 154 children accessed services in Yukon last year.
In Nunavut, the Representative for Children and Youth was appointed in 2014. The office supports young Nunavummiut by giving voice to their concerns and ensuring the government protects and advances their rights and interests. An elders' council helps guide the work. In their last annual report, the office reported opening 83 files.

Mr. Speaker, it is time for the NWT to offer this same service to children and youth here. First, there is a big population of children accessing government services, an average of 1,000 children per year in each of the last 10 years. Second, the work of the Office of the Auditor General revealed that health authorities have not maintained regular contact with many of the children they have removed from homes and placed in foster care or other places. We know that contact with children and youth out of the territory was also lacking. This is obviously a very vulnerable group, ranging in age from six months to 18 years, who have rights, including the right to be heard and to be treated fairly. The child advocate can provide the linkage between different players in the child's life to further his or her interests. Mr. Speaker, I'm going to seek unanimous consent to conclude my statement.

---Unanimous consent granted

MS. GREEN: Mr. Speaker, it's time for the GNWT to provide better services to children and youth. Creating a child and youth advocate is the place to start. I will have questions for the Minister of Health and Social Services. Mahsi.

DEPUTY SPEAKER: Members' statements. Member for Nahendeh.

MEMBER'S STATEMENT ON WINTER ROAD SAFETY

MR. THOMPSON: Thank you, Mr. Speaker. Mr. Speaker, it is that time of year when we see a number of individuals end up in the ditch. I have done that myself a few times in my life.

Mr. Speaker, I would like to thank the Department of Infrastructure for offering advice for winter driving. Even expert drivers must benefit from a refresher and, if you know anyone who’s planning to drive up to the Northwest Territories, I hope you pass these tips along. I would like to share a couple of those tips here today:

- make sure every individual in the vehicle has warm winter clothing available;
- prepare a winter survival kit with warm clothing, candles, flashlight, matches, sleeping bags, first aid kits, pocket knife, nuts, energy bars, a brightly coloured cloth, a small shovel, sand, and a tow strap; and
- tell everyone your travel plans, when you're leaving, what route you'll be taking, and when you plan on arriving, before you leave.

Mr. Speaker, Northerners are used to helping out when others are in need. I see this all the time, not only in our communities but on our own highways and winter roads, whether it's a clear, dry night; under the midnight sun; or snowy, icy conditions at minus 40.

Personally, I've been grateful when people stopped to help me on the highway, and I've tried to pay it forward when I see others in need. Earlier this year I heard about two Sahtu residents helping out a stranded Alberta traveler on the Colville Lake winter road, one of the many stories out there.

Mr. Speaker, this past Friday evening a couple of ladies ended up in the ditch, and I would like to quote the lady: “A beautiful thing about being from and living in the North is the kindness and generosity of true Northerners. It can't be beat. Big shout-out to George and Anna Tsetso; Chris Hewitt; Tow Williams; Dave Crawford, who works for Sharps Trucking Company from Edmonton, for helping me and my mom out and getting us home safely. Thanks to Jenn Kraus for checking on us and calling for backup, and others who stopped to check on us. We are very grateful.” I would like to thank those people, as well, Mr. Speaker.

DEPUTY SPEAKER: Thank you, and we wish everyone safe travels in this winter season. Members’ statements. Member for Tu Nedhe-Wiilideh.

MEMBER'S STATEMENT ON COST OF LIVING

MR. BEAULIEU: Marsi cho, Mr. Speaker. Mr. Speaker, there has been a lot of discussion about our government doing what it can to reduce the cost of living for our citizens. In fact, it's a mandate of our government to do just that. However, Mr. Speaker, the opposite is occurring because, over the years, we've seen cost increases to our citizens in various ways, some through taxes, leases, fees, and inflation. This has in effect increased the cost of living.

Mr. Speaker, I've risen many times in the House, offering ideas on how to decrease costs to our people and our government, which for the most part have been ignored. I've talked about fixing up homes for seniors, to make them more efficient to operate; I've spoken about daycares, where people can go to work, both of which are viable options and help decrease our social spending.

Furthermore, Mr. Speaker, I have spoken about investing in homecare and early childhood
development as areas which offer potential for great long-term savings. I've also discussed the idea of converting the old Stanton hospital into a school for homecare workers and nurses, as well as the idea of our government expanding into the conservation economy through investments in initiatives such as Indigenous guardians and ecotourism.

In addition, Mr. Speaker, there are other jobs to get families off income support, jobs like youth workers, working in environmental clean-ups, and jobs in the field of wellness at the community level. Increasing employment rates in small communities will benefit all communities, including Yellowknife and the regional centres.

Mr. Speaker, I have used the term "all boats shall rise" many times in this House because, if people work in our small communities, they will spend their money in Yellowknife and the regional centres, creating another level of the economy. Thank you.

DEPUTY SPEAKER: Members’ statements. Member for Deh Cho.

MEMBER’S STATEMENT ON DEH CHO/MACKENZIE RIVER SIGNAGE

MR. NADLI: Thank you, Mr. Speaker. Last February, I had an exchange in this Chamber with the Minister responsible for Industry, Tourism and Investment, as well as Infrastructure. I pointed out that the sign by the highway that identifies the mighty Deh Cho as the Mackenzie River is a very tiny sign. I mentioned that, for visiting tourists, there is no information about the river and its rich history. Even its proper name, Deh Cho, meaning "big river," is neglected. I suggested that there should be a larger sign, a roadside exhibit, and maybe a picnic spot.

The Minister was very supportive of this idea. His response, from Hansard, included this comment: "The Member’s point is well taken [...]. The Mackenzie River is important, not just to his region but to the whole NWT. It is how people travelled in this country for years and years. I think it is a good idea to celebrate this type of feature." Mr. Speaker, I wholeheartedly agree with the Minister, who went on to say, "We'll take a serious look at it [...] It is not something that will happen overnight." Since we spoke, about 350 nights have gone by and I am still dreaming of the great big, beautiful sign to mark the Deh Cho for travelers on the road. I am growing concerned that marking the second-longest river in North America might be winding through a long and tedious bureaucratic process.

Tourism is a growing sector of our economy, and we are seeing the road traffic in my home community of Fort Providence. We would like to take advantage of this potential. We would like to see a better tourism experience for people who come this way. This begins with roadside attractions that slow people down a little and encourage them to look around.

I fear that our government forgets these local attractions, distracted as it has been by huge projects and combining departments.

I realize that even a project as modest as a sign for the Mackenzie River takes time to plan, but getting it done within the life of this 18th Assembly seemed like an attainable goal. Later, I will ask the Minister of Infrastructure to signpost the way forward on this project. Mahsi, Mr. Speaker.

DEPUTY SPEAKER: Members’ statements. Member for Kam Lake.

MEMBER’S STATEMENT ON JUNIOR KINDERGARTEN PROGRAM

MR. TESTART: Thank you, Mr. Speaker. Mr. Speaker, it has been brought to my attention by several constituents that the implementation of junior kindergarten has left more than a few gaps.

These concerns were brought to me by parents and northern teachers who are concerned with the implications of several of the shortfalls of the junior kindergarten program. Currently, there is still no provision for signing-in and signing-out of children. So far, we have been lucky, but I am curious as to why, when I pick my own son up from his privately run after-school program, I must sign him out, while there is no provision for this in government-mandated junior kindergarten.

It has also been brought to my attention that there is only "recommended" health screening for students entering into JK. Mr. Speaker, I'm sure this is on the minds of many parents in recent days, due to the confirmed case of the measles here in the NWT. I am alarmed, as are many, that health screening, that is to say testing on hearing, vision and immunizations, are not required prior to entry into the junior kindergarten program. This could put our children, our families, and our communities at great risk of the possibility of outbreak.

Mr. Speaker, adult to child ratios are high under the Day Care Act. Yes, this was done to minimize the increased costs of implementing the JK program, but where once there was a ratio of either 1:8 or 1:9, there is now an allowance of a ratio of 1:25. This has left staff stretched too thin. Bathroom breaks, recess, fire drills, evacuations, all of these test the limits of teaching staff's focus. Under the current process, there are gaps in the supervision of children. This often requires that administrative
staff fill these gaps should a child need to go to the bathroom while the rest of the students are suiting up or dressing down for recess, let alone if one of the children has an accident. If all goes to plan and no child needs to use the bathroom or there are no other complicating factors, getting ready to go outside for recess can be a 30-40 minute endeavour.

The implementation of junior kindergarten received a lot of attention earlier in this Assembly. Though we have moved to other pressing matters, it is clear that this area continues to demand our attention as these problems must be resolved to ensure the future success of students and teachers alike. Thank you, Mr. Speaker. I will have questions for the Minister later today.

**DEPUTY SPEAKER:** Members’ statements. Member for Nunakput.

**MEMBER’S STATEMENT ON ELDERLY HEALTHCARE**

**MR. NAKIMAYAK:** Thank you, Mr. Speaker. Mr. Speaker, today I wanted to raise a few issues affecting elders’ healthcare that have been brought to my attention by Nunakput residents.

The people of Nunakput are concerned that elders’ healthcare in the region is not all it could be or even all it should be. In some cases, language is a barrier, and the lack of available translators makes it even harder, Mr. Speaker. In others, there are issues with homecare workers. Some Nunakput communities have no homecare workers, thanks to the cuts in the past that affected those positions. Elders are concerned that, without homecare workers, there is no one available to help them on a daily basis, especially elders who live alone. Mr. Speaker, the aging in place initiative leaves out the elders who live in the smaller communities across the territory, mind you, ones that are most isolated.

Mr. Speaker, we also have social workers, but they are taking on a lot of work, often including travel to multiple communities. This means that visits are far too often and far too brief. More generally, constituents have also told me that they are troubled by the lack of engagement from the health centres. Many are given Tylenol and sent home.

Mr. Speaker, we know that our population is aging and that it has consequences for all kinds of government planning. The Department of Health and Social Services has done a lot of work in assessing long-term care and needs, and the Housing Corporation is figuring out the kinds of supports, services, and infrastructure our elders will need to age in place in their home communities.

Mr. Speaker, this is not just a matter of support for elders; it is a matter of cultural safety. The government’s duty is to provide culturally safe, culturally appropriate care to Indigenous people, particularly vulnerable populations like our elders. This applies to the full spectrum of healthcare, from check-ups at the health centre to routine procedures like cancer screenings to emergency care and where it is needed most.

Mr. Speaker, we need to take care of our elders, and when we plan, we need to incorporate local perspectives from our small communities. Thank you, Mr. Speaker.

**DEPUTY SPEAKER:** Members’ statements. Item 4, returns to oral questions. Item 5, recognition of visitors in the gallery. Minister of Education, Culture and Employment.

**Recognition of Visitors in the Gallery**

**HON. CAROLINE COCHRANE:** Thank you, Mr. Speaker. I want to recognize our NWT Language Board members who decided to join us today. I am really glad to see you up there. We have Tammy Steinwand-Deschambeault, who is the chair. Excuse me if I get the names wrong. Jonas Landry, Emily Kudlak, Vance Sanderson, the vice-chair, Angie Lantz, Bella T’Seleie, Betty Elias, Eleanor Mitchell-Firth, Linda Bussey, and Dr. Angela James is with them today. Welcome to everyone. It is important work you do. I am looking forward to meeting you this week.

**DEPUTY SPEAKER:** Recognition of visitors in the gallery. Member for Yellowknife North.

**MR. VANTHUYNE:** Thank you, Mr. Speaker. Today, from William McDonald School, we have two Pages from the riding of Yellowknife North. I would like to recognize and welcome Kaatje Fulford and Teresa Martin. Thank you to all the Pages for the great work they do on our behalf. Thank you, Mr. Speaker.

**DEPUTY SPEAKER:** Thank you. Recognition of visitors in the gallery. Member for Thebacha.

**HON. LOUIS SEBERT:** Thank you, Mr. Speaker. I would like to recognize Vance Sanderson from Thebacha.

**DEPUTY SPEAKER:** Recognition of visitors in the gallery. Member for Deh Cho.

**MR. NADLI:** Mahsi, Mr. Speaker. I would like to recognize Jonas Landry, a constituent. A friend and relative, Jonas serves on the Northwest Territories Language Board for the Deh Cho, and also he is from Fort Providence. Mahsi.
MR. NAKIMAYAK: Thank you, Mr. Speaker. I would like to recognize a couple of constituents, Ms. Betty Elias from Tuktoyaktuk and my cousin Emily Kudlak from Ulukhaktok. Mr. Speaker, I spoke earlier a couple of times about language and how important it is. It is good to see that we have strong representatives from Nunakput. I would like to welcome both guests and everybody else. Thank you, Mr. Speaker.

HON. BOB MCLEOD: Thank you, Mr. Speaker. I am pleased to recognize some guests in the Chamber, Mr. and Mrs. Ray Prince. Ray is a long-term colleague from a previous government, and they are here visiting family here. Thank you, Mr. Speaker.

MR. BLAKE: Thank you, Mr. Speaker. I would like to recognize one of my constituents, Eleanor Mitchell Firth, who does a lot of work with the Gwich'in language, and also a lot of great arts and crafts. She does a lot of good sewing. I actually have to get a pair of slippers one of these days, but I would like to recognize her. Thank you very much, Mr. Speaker.

MR. MCNEELY: Thank you, Mr. Speaker. I would like to recognize our young Page here from Deline, Taylor Schear. This is her first trial. Thank you, Mr. Speaker.

MS. GREEN: Thank you, Mr. Speaker. I would like to welcome my constituent Linda Bussey who is continuing her public service, this time on the languages board. Merci beaucoup, Linda.

DEPUTY SPEAKER: Recognition of visitors in the gallery. Member for Yellowknife Centre.

MR. NAKIMAYAK: Thank you, Mr. Speaker. Earlier, I spoke about elders' healthcare. My questions are for the Minister of Health and Social Services. Mr. Speaker, the Department of Health and Social Services is waiting for the results of a homecare review to help them decide how to allocate future resources. My question is: what is the status of this work, and when will the department be ready to act on the findings? Thank you, Mr. Speaker.

HON. GLEN ABERNETHY: Thank you, Mr. Speaker. As a government, our mandate is to support the elders to live in their own houses for as long as possible while ensuring that adequate supports are available for those who can no longer live within their own homes. We have taken a number of actions to meet that mandate, which are within the Continuing Care Services Action Plan, which has already been released. We will be compiling the home and community care review. That is currently under way.

The purpose of that review is to document existing home and community care resources, programs, and services offered by each region and community to identify any gaps that may exist, future requirements, and, obviously, opportunities for improvement. This will ensure that the services are available, that they are accessible, and that they are effective in meeting the nursing care needs and support needs of elders to stay in their communities.

Mr. Speaker, we also hope that this will help identify program options that better match the needs for elders and seniors with funding available through the GNWT. The interim report will be available on March 31, 2019 with the final report, we hope, out in May of 2019. Thank you, Mr. Speaker.

MR. NAKIMAYAK: It is good to hear that from the Minister. The needs specifically for communities seem different in different regions. The department has been trying to improve homecare service for a couple of years now, including $2.5 million in the 2017-2018 budget. Can the Minister tell us whether all these findings were used and how they were used?

HON. GLEN ABERNETHY: Significant new funding has been available to homecare beginning in 2017-2018. $2.5 million annually was included as an investment within the Government of the Northwest Territories. We also have $7.4 million for homecare over a 10-year period that we got from the federal...
government. This new funding is helping health and social services system enhance home and community care programs and services for clients across the Northwest Territories. Some of the ways that we have been able to do that is the establishment of 14 new homecare positions, as well as training for them, equipment, supplies, and other things that would have been available across the authorities. We have also created five new positions at the department to support the work that we have identified in the Continuing Care Services Action Plan.

Having said that, Mr. Speaker, we recognize that, in the past two years, we have the challenge to spend the $2.5 million investment from the Government of the Northwest Territories. Much of it has been due to the fact that funding, which was needed and appreciated, thanks to the Members for championing it, was not necessarily expected. It has taken the system a little bit longer than we had hoped to put the programs and services in place. It took longer to fill and create those 14 positions than anticipated.

In 2017-2018, the first year we got the money, we did lapse around $900,000. In the 2018-2019 year, we have probably around $500,000 that has been lapsed. I do need to make it clear, Mr. Speaker, and it is important to note, the defunding reallocation or this lapse does not and has not resulted in the reduction of any services in homecare. These were new dollars, and we have spent most of them.

MR. NAKIMAYAK: I appreciate the response from the Minister. Mr. Speaker, from the way it sounds, it sounds like government-administered programs that span across the 33 communities of the territory seem to run quite successfully, and I think the homecare workers is one of those ones in the making to refine to become more specifically to help elders. Mr. Speaker, the department has also done some great work on cultural safety, including a new action plan. How does that action plan speak to the need for health centre staff to engage with the communities, including language translation services?

HON. GLEN ABERNETHY: I am pleased to inform the Member that tomorrow I’ll be tabling “Caring For Our People: Cultural Safety Action Plan 2018-2020.” Tomorrow I will also be hosting a public launch here in the Assembly at 11:00 a.m., and I hope that all Members are able to attend.

Regarding the Member’s concerns about cultural safety for Indigenous residents and elders, work is already under way. First, I’d like to highlight the 2018-2020 Inuinnaqtun pilot program at the Enegak Health and Social Services Centre in Ulukhaktok funded by the department. The pilot project will support the language needs of the Inuinnaqtun speakers receiving health and social services care in the community, as well as those on medical travel, so we’re trying to make progress in that area.

DEPUTY SPEAKER: Oral questions. Member for Nunakput.

MR. NAKIMAYAK: Thank you, Mr. Speaker, and thanks to the Minister for the invitation, as well. Mr. Speaker, pilots like that such the Minister spoke of could become something very useful across the territory, with the technology we have today. I have one more question about cultural safety, and the question is: how does the department’s new action plan speak to regular engagement between the department and communities on new healthcare policies and initiatives? Thank you, Mr. Speaker.

HON. GLEN ABERNETHY: I, like Members in this House, have heard time and time again that the NWT health and social services system is not safe for Indigenous residents, nor does it account for Indigenous culture or healing needs. That is why, for the past 16 months, staff at the department have worked with Indigenous Northerners to hear their experiences, concerns, and aspirations for the NWT health and social services system. This included meeting with regional wellness councils, including the Beaufort-Delta, where council members had the opportunity to voice their community concerns about the health and wellbeing of their residents and the delivery of those services.

What we heard clearly echoed some of your constituents’ concerns that Indigenous residents experience language barriers, that meaningful discussion with staff and healthcare systems can be and often is a challenge. We are releasing the cultural safety action plan tomorrow, and I’ll be providing more details on that tomorrow, so there will be an opportunity to hear about some more of the things we’re doing then. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Kam Lake.

QUESTION 605-18(3):
JUNIOR KINDERGARTEN PROGRAM

MR. TESTART: Thank you, Mr. Speaker. I’d like to ask the Minister of Education, Culture and Employment what assessment, if any, has been done on the operations of the junior kindergarten program? Thank you.

DEPUTY SPEAKER: Minister of Education, Culture and Employment.

HON. CAROLINE COCHRANE: Thank you, Mr. Speaker. The junior kindergarten program was
piloted in some communities for a couple of years, and then this last year it was implemented across the Northwest Territories. There hasn't been a full assessment done on the total implementation, but we will be looking at it over the summer months, once the school year is finished, to find out what worked, what didn't work, and what we need to improve on. Thank you, Mr. Speaker.

MR. TESTART: I mentioned a number of concerns in my Member's statement, so I'll go through each one of them, but does ECE through the Minister currently have a plan to address the medical screening, or lack thereof, for children who are coming into these programs?

HON. CAROLINE COCHRANE: I will have to look into that. My assumption was that all children who access either licensed childcare centres or junior kindergarten and school are recommended to have up-to-date immunizations, but I will look into that and get back to the Member on that.

MR. TESTART: I can tell the Minister that a recommendation and a requirement are different. Those are the concerns that have been brought forward to me. Further to that, with the teacher to children ratio, it seems 1:25 is putting a lot of stress on these classrooms and the learning environment that these children are supposed to be benefitting from. Is the Minister open to re-evaluating that while this review takes place in the summer?

HON. CAROLINE COCHRANE: As one of my colleagues said the other day, I will do better than that. In fact, they are funded at 1:12, so if they are doing 1:25, Mr. Speaker, we have a bit problem. I'm going to be looking into that right away, because they are funded at 1:12.

DEPUTY SPEAKER: Oral questions. Member for Kam Lake.

MR. TESTART: Thank you, Mr. Speaker, and thank you to the Minister. I very much appreciate that. If the results of this survey confirmed these concerns that have been brought forward today, is the Minister willing to go that extra distance and commit to at least exploring a possibility of adding more money into the program to address these shortfalls? Thank you.

HON. CAROLINE COCHRANE: The schools are actually funded for 1:12. They're not funded 1:25, they're funded 1:12. I will look into the other things. Like I say, we'll do a review at the end of the year. I'm not going to be quick to say we'll throw money at things if it's not needed. What I am working on currently, though, is looking at, because we have a curriculum for JK, junior kindergarten, but I'm looking at strengthening the curriculum for childcare centres, licensed childcare centres, as well. I believe in equality and I believe in equity, and so we need to make sure that the services for children are similar right across.

One thing I picked out from Member's statement today, though, Mr. Speaker, already is we're doing a bad job of communication. I've said that a few times, in our departments, that we need to work on our communication. If the MLAs are thinking that we're getting funded for 1:25, I can imagine what the general public thinks, so we need to do better on our communications. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Yellowknife Centre.

QUESTION 606-18(3):

CHILD AND YOUTH ADVOCATE

MS. GREEN: Mahsi, Mr. Speaker. My questions are for the Minister of Health and Social Services. During his almost eight years in his portfolio, has the Minister had any discussions about developing an office for child and youth advocacy in the NWT? Mahsi.

DEPUTY SPEAKER: Minister of Health and Social Services.

HON. GLEN ABERNETHY: Thank you, Mr. Speaker. In the 16th Legislative Assembly I participated on a committee that did a review of the implementation and delivery of child and family services in the Northwest Territories. With the chair, who at the time was the honourable Member for Tu Nedhe-Wiilideh, we travelled throughout the Northwest Territories. We also travelled to many other jurisdictions and we talked to professionals about these services. One of the things that came up on a regular basis was the child advocate. We met with the child advocate in Alberta and we talked about the role of an advocate.

At that time the committee, based on their discussions, did not recommend an advocate, but rather in recommendation 25 of the report they recommended some changes to the legislation that would allow a child to have some representation, and that could have been a legal professional, extended family, a member of the parents' band council. There was also a second recommendation, recommendation 26, to establish a mechanism to ensure that every child's voice is heard and that the child understands what is happening to them at every level of the child welfare system. Those recommendations were accepted and enacted. There were changes to the Child and Family Services Act that allowed individuals to be there as an advocate for them. It wasn't a child advocate as the Member is describing, but we also moved forward in the Department of Justice and established the Office of the Children's Lawyer in
2011-2012 to allow for children to be appointed a lawyer in certain child protection issues.

I recognize that a children's lawyer is not a child's advocate, but when it comes to a child who has access to the legal system, they provide those types of services. So it doesn't get every child, as the Member is describing, but it certainly touches those who are engaged in the court system. Thank you, Mr. Speaker.

**MS. GREEN:** I appreciate the fulsome answer from the Minister. He said that he wants to make sure every voice is heard. I am wondering what the mechanism for that is without someone in a formal advocacy position.

**HON. GLEN ABERNETHY:** The Child and Family Services Act, after it was amended, actually allows for a child and each parent of the child to choose and be accompanied by an adult who may assist them in the expression of his or her views when engaging the courts and when engaging the system. It doesn't necessarily allow or support the child advocate as the Member is describing, but it does allow for advocacy.

The Office of the Children's Lawyer began serving clients in 2011. I understand, once again, that that is not a child advocate, but it does provide those services once a child has access to the court system through Child and Family Services. We are doing some of those things. The legislation allows us to have other people advocate on their behalf.

**MS. GREEN:** Given the two reports from the Office of the Auditor General which both feature concerns about children not being heard and not being in regular contact with authorities, I am wondering if the Minister is ready to revisit this discussion about having an independent, arms-length agency that is an advocate for children and youth?

**HON. GLEN ABERNETHY:** These were conversations that occurred both in the 16th and the 17th Legislative Assemblies. At that time, we did not move forward with the child's advocate. Neither the committee recommended nor the government of the day moved forward with it. The child's advocate is not a children's lawyer, as I have already indicated, but they are more comparable to an ombud with a focus or a specialization in children and youth.

If this Assembly were interested in pursuing that, it would require legislative changes or legislative drafting. It would require budgeting. It would require a number of things. We didn't contemplate that in the remainder of this Assembly. Instead, we are looking at other types of positions that can support families and children, like family support workers under the Child and Family Services Act and Building Stronger Families. We didn't contemplate that as a result of discussions in previous Assemblies, and we are focusing more on other types of positions that could provide those types of supports.

**DEPUTY SPEAKER:** Oral questions. Member for Yellowknife Centre.

**MS. GREEN:** Mahsi, Mr. Speaker. I think it is worth revisiting this conversation because of the number of things that have changed in the last one or two terms since the Minister was a Regular Member around having a child and youth advocate. As I indicated in my statement, there is considerable uptake in both the Yukon and Nunavut in having these services available to children. Given that interest, how can I, as a Member of the Standing Committee on Social Development, move this initiative forward so that we can engage in conversation with the Minister and his department? Mahsi.

**HON. GLEN ABERNETHY:** I appreciate the role of a child advocate. I did have opportunities to meet with child advocates in other jurisdictions and learn about the importance of them. I am not saying the Northwest Territories will never have a child advocate, nor should we never have a child advocate. The bottom line is, for the remainder of this term, we are already looking at our last O and M budget before us. It would take legislative drafting. Given the legislative agenda that is in front of us, it probably is not something we are going to be able to accomplish.

However, that doesn't mean we can't start looking at it. If this is something that committee would like us to put some attention on, at least do some research around the concept, what it would take, we are happy to look at those things. I don't believe we are going to be in a position to write legislation, pass legislation, or get it funded within the life of this government. We are certainly open to input from committee. Thank you, Mr. Speaker.

**DEPUTY SPEAKER:** Oral questions. Member for Frame Lake.

**QUESTION 607-18(3): MINISTERIAL APPOINTMENTS**

**MR. O'REILLY:** Merci, Monsieur le President. My questions are for the Premier. Earlier today I raised the issue of public concern around the appointment of the workers' advisor by the responsible Minister. Can the Premier tell us whether he had knowledge of the appointment before it was formally made or announced? Mahsi, Mr. Speaker.

**DEPUTY SPEAKER:** Honourable Premier.
HON. BOB MCLEOD: Thank you, Mr. Speaker. No.

MR. O’REILLY: I want to thank the Premier for that quick reply. Presumably, the Premier, as the chair of the Executive Council, exercises some oversight on ministerial performance and actions, including appointments. Can the Premier confirm whether he does exercise oversight on ministerial appointments and explain how he carries out that responsibility?

HON. BOB MCLEOD: The appointment the Member refers to is a ministerial appointment. The position for which the appointment was made is consistent with section 107, subsection 3, of the Workers’ Compensation Act.

MR. O’REILLY: I want to thank the Premier for reciting the famous section 107 of the act. He didn’t actually answer my question, but I am going to go on. In the statement I made, I discussed the Cabinet-approved Boards Policy that states, "The process for appointments to GNWT boards should be timely, consistent, and transparent." Does the Premier agree that all ministerial appointments should be timely, consistent, and transparent, and that the recent workers’ advisor appointment met those tests?

HON. BOB MCLEOD: We track board appointments. Where Ministers have the responsibility for making direct appointments, we leave that to the Ministers. I am not in the practice of reviewing all decisions in hindsight.

DEPUTY SPEAKER: Oral questions. Member for Frame Lake.

MR. O’REILLY: Merci, Monsieur le President. Thanks to the Premier for that, and I agree. Let’s look forward, now. Lastly, there doesn’t appear to be any policy or guidance around ministerial appointments for positions not on boards. Given the public concern around the recent appointment of the workers’ advisor, can the Premier tell us whether he is now prepared to develop and implement a policy framework for all ministerial appointments? Mahsi, Mr. Speaker.

HON. BOB MCLEOD: I guess, first of all, we will have to determine: this may be the one and only ministerial appointment in the Government of the Northwest Territories. I guess that would be my first step, to determine whether that is the case or not. If there is more than one ministerial appointment, then we would determine whether there are enough ministerial appointments that would warrant to have more oversight. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Deh Cho.

MR. NADLI: Thank you, Mr. Speaker. Mr. Speaker, the community of Fort Providence is very interested in the increasing amount of tourism that we are seeing in terms of small-community travel. My questions are to the Minister of ITI and Infrastructure: what actions have been taken in the last year toward getting a big sign erected to alert travellers that they are approaching the mighty Deh Cho? Mahsi.

DEPUTY SPEAKER: Minister of Industry, Tourism and Investment.

HON. WALLY SCHUMANN: Thank you, Mr. Speaker. The Member has brought this to my attention today. Upon follow-up, the short answer is: none. The ITI staff has met regularly with the tri-council organization in his community. There are a number of discussions that have taken place there. Upon further follow-up, we have not had any discussions on what we talked about in the House. Thank you, Mr. Speaker.

MR. NADLI: What are the steps to getting a sign placed along the highway?

HON. WALLY SCHUMANN: To get a sign along the side of the highway, that is through the Department of Infrastructure. There are both guidelines and a formal process that is in place to approve all sign applications for signage along our highway network in the Northwest Territories. Signs need to meet a technical requirement. Any person or organization who wants to put up a sign must apply through an application process.

MR. NADLI: The Minister has agreed that a big Deh Cho sign in the roadside park is a good idea. I am thinking that it is the government’s job to initiate projects like this on the road system. Will the Minister confirm that he will get this job done?

HON. WALLY SCHUMANN: As I have said in previous questions from the Member and the House, I think that this is a great idea. On the second part of the question, I don’t know if we need to be the initiator of it. I am going to talk to my superintendent in the region about having a conversation with the local community groups that need to be involved, but I think that this needs to be pushed as well from the local group, and maybe with some input from our MLA from the riding, to get some input from him, as well. I think that this needs to be collaborative approach, not just a one-sided approach, but we certainly need to work together on this. I know that I made a commitment in this House to have this discussion with his community, and we will do that.
DEPUTY SPEAKER: Oral questions. Member for Deh Cho.

MR. NADLI: Thank you, Mr. Speaker. I have reached out to talk to Members of the Deh Gah Bridge Society and DÍGAA Enterprises, and they are willing and very interested in making this a possible reality. When will the Minister instruct the Department of Industry, Tourism and Investment to develop a program for this sign project and seek input on the content from local governments? Mahsi.

HON. WALLY SCHUMANN: As I said, I will get our superintendent to go in there to have a discussion with the tri-council group in the community. I know that there has been a lot of conversation with that group, particularly around the old landing site for the ferry landing, about turning that into a park, which would be a long-term project that we are trying to work on and have discussions with them. I know that there needs to be some restoration work, if I remember from my briefing with DFO on that, but I will be sure that our superintendent, when we go there and meets with the tri-council again, initiates the conversation about this signage project along the highway. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Nahendeh.

QUESTION 609-18(3):
WORKERS’ SAFETY AND COMPENSATION COMMISSION FEES

MR. THOMPSON: Thank you, Mr. Speaker. I have been approached by a number of businesspeople asking why their WSCC rates are going up. Unfortunately, I cannot answer their questions with certainty. Therefore, I have some questions for the Minister responsible for WSCC. Can the Minister explain why the rates are going up annually? Is this due to increased costs for administration of programs, a need for more staff, or is this cost related to injured workers? Thank you, Mr. Speaker.

DEPUTY SPEAKER: Minister responsible for the Workers’ Safety and Compensation Commission.

HON. ALFRED MOSES: Thank you, Mr. Speaker. The mandate and the work that the WSCC does is to continue to promote workplace health and safety. The increase is attributed to the increased costs for the treatment and care of injured workers across the Northwest Territories. Thank you, Mr. Speaker.

MR. THOMPSON: It is my understanding that the Government of the Northwest Territories pays 88 cents per $100 on their payroll. It seems to be very low, especially when we look at departments such as Infrastructure, Health and Social Services, and Justice, in other words, Corrections. Can the Minister confirm that the departments are broken down into their own industry codes, or is the GNWT as a whole classified as one code?

HON. ALFRED MOSES: As the government, the GNWT has one employer for all of our workers and people who do work on our behalf. It is classified under a single industry code, that code being class 81. Being an employer, GNWT as one employer, we are just focusing on that class 81.

MR. THOMPSON: That gives me a bit of a concern, when we have such a variety of people working for the Government of the Northwest Territories. If we did break down each department into their own code, similar to what we do with businesses, would we see businesses rates go down?

HON. ALFRED MOSES: The employer base across the territory funds the system for anyone who needs treatment or care under our class 81. Changing the allocation of how that system works would obviously, for one thing, probably have a lot of administrative work that would need to go into that. If the Member is asking specifically on each department, some probably would go up. Some would probably go down.

As you know, we have employees who do different types of work, and it would really be based on each department. Some would probably go up; some would go down. That is why, with the GNWT being the sole employer, we follow the industry code, being class 81.

DEPUTY SPEAKER: Oral questions. Member for Nahendeh.

MR. THOMPSON: Thank you, Mr. Speaker. Again, thank you very much to the Minister for giving information and clarity to some of these questions. I still have some concerns, though. I can’t see our rates going down too low for our secretaries and that, but with hospitals and corrections, I could see it going up. My last question, Mr. Speaker, is: is my understanding that the Minister’s role is to ensure that everybody pays their own fair share, including the GNWT? Can the Minister explain what his role is with WSCC? Thank you, Mr. Speaker.
HON. ALFRED MOSES: The Minister has an arm's-length role working with the WSCC. As I mentioned, and as he said in his recent comments, with each department, and he mentioned a couple in terms of Justice, Corrections, Health and Social Services, compared to, you know, administration, the costs would be up and down. My role, like I said, is at arm's length, but we also have a governance council that does oversee the conduct of business and management of the WSCC. That is my current role, at an arm's length, but also working with the governance council to make sure that workplace health and safety for our employees is administered. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Yellowknife North.

QUESTION 610-18(3):
INDIGENOUS EQUITY IN MINERALS INDUSTRY

MR. VANTHUYNE: Thank you, Mr. Speaker. In my Member's statement today I was talking about Indigenous ownership of mining and resource development projects. My questions are for the Minister of Industry, Tourism and Investment. In recent years, we have seen positive partnerships between Indigenous organizations, and the diamond mines in particular. They have provided a number of services to the diamond mines, but now the talk is about actually starting to hold some equity ownership in potential projects. I would like to ask the Minister: can the Minister speak about how the government can help encourage Indigenous partnership at a high level in resource projects? Thank you, Mr. Speaker.

DEPUTY SPEAKER: Minister of Industry, Tourism and Investment.

HON. WALLY SCHUMANN: Thank you, Mr. Speaker. Our role would be as partners and supporters of Indigenous governments to do this. We are very interested in working closely with Indigenous governments and their development corporations, our federal partners, the federal government, to achieve the shared goals of economic empowerment, for sure. It is a conversation that has already started rolling out. We had an economic summit in Inuvik last fall. The Premier had one. Myself and the Minister of Finance were there. We are committed to continuing these types of conversations. I think the summit was a good starting point to have these discussions, and we are very interested in helping Indigenous governments who want to go down this road to be able to participate in this manner. Thank you, Mr. Speaker.

MR. VANTHUYNE: Thank you to the Minister for that reply. That is good information to start to get an understanding and a handle on sort of the direction that we are going and some of the first steps that could be understood from a number of interested parties. I would like to maybe expand upon that a little bit and just ask the Minister: many Indigenous companies, as I have mentioned, provide services to the mines. What ways can the government support them as they prepare to take next steps towards equity ownership?

HON. WALLY SCHUMANN: I will give you a few examples of what we are doing already. As many people in this House know, we have our regional mineral development strategies that we are working with the regions on this, developing them, for those who want to participate in that manner. We are doing two, I think, in this budget cycle again. Our government is already bringing Indigenous governments into the fold as we reach out to the investors of the Global Resource Conference. That is another good example, but we also have funding available from our government to support capacity-building in these areas. We believe that these have proven out to be effective to help the Indigenous governments that want to participate.

MR. VANTHUYNE: Thank you to the Minister for his reply. This is good information. I would like to take it another step further and ask the Minister if the government is working on any kinds of strategies at all in terms of what strategies can the government use to encourage to possibly even incubate communications and partnerships between Indigenous companies and the resource industry?

HON. WALLY SCHUMANN: As I said, we have our regional strategies. Those are good over the long term, I think, to help the Indigenous governments on where they want to go on this. Our own mineral development and petroleum strategies lay out concrete actions to support Indigenous governments. They are clearly laid out in that. Ultimately, it really comes down to engagement. It is something that we have proven that we are very good at encouraging. We have seen that at Round Up already, the last two times that we have been down there. We have a defined structure that is already in place with the public and Indigenous governments and industry to work together, and we will continue to work on that. That is a solid foundation that puts us head and shoulders above the rest of the country, I believe. With our competitors around resource development, we will continue to encourage that and work with the Indigenous governments that want to pursue this.

DEPUTY SPEAKER: Oral questions. Member for Yellowknife North.

MR. VANTHUYNE: Thank you, Mr. Speaker. Thank you to the Minister for his reply. This all seems to be very positive information. In the past, we have set
some degree of precedent in this regard. This is not new to the Northwest Territories. Many will recall that the Mackenzie Valley pipeline was also one third Indigenous-owned, and so I would just like to ask the Minister: how can this government continue to work toward developing these types of Indigenous equity partnerships in the future? Thank you, Mr. Speaker.

HON. WALLY SCHUMANN: I think we have clearly laid out that we know, to encourage development in the Northwest Territories, that we have to work with all our partners and all our residents across the Northwest Territories in collaboration. I think, with just a quick thought in my head when we are talking about this, it goes back to the announcement we just made with the federal government around the Taltson project. It is quite clear that this government is focused on bringing Indigenous governments into the fold on how we want these projects to move forward. This gives you a very good example of how it laid out the financial support that is going to be laid there to see how they want to be able to participate in these things going forward.

Dr. Ken Coltson and his group have had a couple of economic symposiums. There were some great speakers who also took place there. You know the First Nation Major Project Coalition was there. Dr. Ken Coltson talked about how these projects, right across the country, how Indigenous governments can be able to participate and how they could help support all the Indigenous governments together on how they can figure out how to do this.

Equity is a big challenge on some of these things, but there are a number of things going on at a number of fronts on trying to figure out Indigenous participation and resource development can take place in this country. We will certainly keep our ear to the ground and figure out can we do this for the groups that want to do it. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Tu Nedhe-Willideh.

QUESTION 611-18(3):
REDUCING THE COST OF LIVING

MR. BEAULIEU: Marsi cho, Mr. Speaker. In my Member's statement I talked about the cost of living mandate. I have questions for the Premier. I would like to ask the Premier if he agrees that retrofitting homes for energy efficiency would reduce the cost of living for people. Thank you.

DEPUTY SPEAKER: Honourable Premier.

HON. BOB MCLEOD: Thank you, Mr. Speaker. Certainly, I agree with the Member's statement. The Government of the Northwest Territories released its 2030 Energy Strategy in 2018, and that will help address the cost of living by increasing support for energy efficiency and conservation, including a goal of increasing residential energy efficiency by 15 percent. Thank you, Mr. Speaker.

MR. BEAULIEU: Another item for cost of living, according to me, anyway, is affordable daycare. Does the Premier support all efforts of creating affordable daycare?

HON. BOB MCLEOD: Affordable childcare is important for families. I support responsible policy and program development that supports the Government of the Northwest Territories' mandate item of making childcare available and affordable for families.

MR. BEAULIEU: Staying with daycare, can the Premier tell the House what progress has been made from the beginning of this government until now on moving toward affordable daycare?

HON. BOB MCLEOD: I think our government has done a lot in this area, especially with junior kindergarten. I think it has certainly made it a lot better for a lot of families, and other initiatives that have been undertaken by this government. We all recognize that, with daycare, more people can work and also make it easier for the family. Also, we are increasing training for licensees that provide daycare as well.

DEPUTY SPEAKER: Oral questions. Member for Tu Nedhe-Willideh.

MR. BEAULIEU: Thank you, Mr. Speaker. Affordable daycare would give an opportunity for people to find work, and there are not many jobs in the small communities. Does the Premier agree that job creation should be one of the GNWT's highest priorities in reducing poverty? Thank you.

HON. BOB MCLEOD: In all the speeches that I make, job creation is a number one priority. I think that we have been saying that for many years. Some people have said that creating jobs is the best social program going. I also say that we ask our children to stay in school and complete their education. As a government, we have to keep our end of the bargain so that, when they graduate, there are good jobs and good business opportunities for them. Recently, we have had some concerns with our NWT economy. I think that job creation has to be our top priority and that we have to keep focusing on creating jobs and opportunities. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Yellowknife Centre.

QUESTION 612-18(3):
YELLOWKNIFE ADULT DAY PROGRAMMING
MS. GREEN: Thank you, Mr. Speaker. My questions are for the Minister of Health and Social Services. We spoke earlier in this sitting about the need for an adult day program in Yellowknife, and he said that his officials were meeting on February 21st to discuss this issue and he would be able to outline the concrete directions being taken following that meeting. Today I am calling on him to do just that. Mahsi.

DEPUTY SPEAKER: Minister of Health and Social Services.

HON. GLEN ABERNETHY: Thank you, Mr. Speaker. On February 21st, that meeting did take place. From this meeting, it is clear that there is a shared interest between parties to work together to build a model of care that really meets the inclusion and care needs of seniors in Yellowknife, while also filling some of the service gaps by building on the capacity that already exist within the city. There is a lot of capacity within the city. I am pleased that the meeting resulted in the formation of a steering committee to support the development of a concrete program development plan. This plan will see the authority and the department working to identify some social inclusion needs of individual seniors and the development of options for program enhancement that are required to meet the needs of these seniors and their families. Through this process, it is expected that we will identify seniors, individuals who with some extra support will be able to get the supports they need to attend different functions, different mechanisms, different events around town, and get that social inclusion that they’re looking for in a safe and reliable way. Thank you, Mr. Speaker.

MS. GREEN: I appreciate the response from the Minister. Can the Minister tell us who is going to deliver the program to the adults who need it?

HON. GLEN ABERNETHY: I think it will be a wide variety of stakeholders. Some of the events that already occur that these individuals can’t get to will continue, so they will be working to find ways to get them to those events. We haven’t absolutely 100 percent articulated who will be the individuals or the group who get those people to those events, and that’s something that we’re working on the detail with our stakeholders right now.

MS. GREEN: It sounds like the program is busing seniors around to different places in Yellowknife, which I find a little confusing. As the Minister knows, there are roughly two groups of seniors who need this program; people who are frail but cognitively intact, and people who are cognitively frail but may otherwise be fine. I’m a little unclear about not having a central place that is a base for providing these services. Is there, in fact, going to be that?

HON. GLEN ABERNETHY: I don’t see this as being a bus ride. That is not the intent. That’s not what the Members and I discussed when we met late last year. What we’re talking about is having an opportunity to provide a client-centred approach that really builds upon the existing organizational strength and moves us away from more of an institutional model. There was a lot of discussion about not having a model which is a place to plunk somebody, take somebody, and get support just there, but to find ways to get them engaged in community. Find them a way to be supported. It doesn’t necessarily absolutely mean that we won’t have a go to location, but some of those things are the things that we’re looking to finalize and build into our model as we go forward.

DEPUTY SPEAKER: Oral questions. Member for Yellowknife Centre.

MS. GREEN: Thank you, Mr. Speaker. I apologize to the Minister. I’m still a little confused about how this is going to work. Previously, the Minister had issued two RFPs for a service provider, and there was no uptake. It was my understanding that there was not a non-profit in Yellowknife that was able to deliver this service. I’m still a little confused about who is delivering this service, and when this service is going to be delivered.

HON. GLEN ABERNETHY: When I met with the Yellowknife MLAs, and then we followed up and met with stakeholders, it was clear that there are a lot of stakeholders who want to be involved. A lot of stakeholders have something they can add to the idea of supporting our seniors who are either cognitively or physically impaired to engage and have socialization, getting to the community. There are a number of stakeholders who want to be involved. There are lots of opportunities to figure out how to get that engagement to occur. What we’re looking at right now is how to work with those partners. The GNWT is clearly going to have a role, but we want to have the steering committee to actually help us quantify exactly what role each of us as parties would play. Recognizing that this has taken a long time and recognizing that the stakeholders recognize that this is important, they will be meeting in March, early March, to start putting together those pieces. I will keep the Member and all Yellowknife Members up to date on that work. I recognize how important it is, and we want to get it right. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Oral questions. Member for Kam Lake.

QUESTION 613-18(3):
WORKERS’ SAFETY AND COMPENSATION COMMISSION RATE STRUCTURE
MR. TESTART: Thank you, Mr. Speaker. Following up on questions asked by my honourable friend from Nahendeh, can the Minister responsible for the Workers’ Safety and Compensation Commission tell us what class and subclasses apply to the Government of the Northwest Territories toward the WSCC’s rate structure? Thank you.

DEPUTY SPEAKER: Minister responsible for the Workers’ Safety and Compensation Commission.

HON. ALFRED MOSES: Thank you, Mr. Speaker. I have to apologize. I didn't hear the end of the question there, but I will get the information in terms of the classes and subclasses for all Members in terms of work that WSCC does. As Members are aware, the Workers’ Safety and Compensation Commission does provide and promote workplace health and safety. I think that is foremost what we should be focussing on. I can get that information about what the Member just asked, and I will get that information for him, and the previous Member who asked the questions, and provide that information to all Members of the Legislative Assembly. Thank you.

MR. TESTART: I think we're well aware of the purpose of the commission. The Minister in response to the previous questions mentioned the GNWT rate which is about 93 cents. I just wonder if that applies across the board to all GNWT employees, all GNWT departments, regardless of the actual work being done? Is there only one rate for the Government of the Northwest Territories?

HON. ALFRED MOSES: In response to the previous questions from another Member, we do pay about 88 cents per $100. As I mentioned, as an employer for the GNWT, one employer for all the departments, we are classified under a single industry code, that code being class 81. In the previous question that the Member asked, we will take a look into it, but as I mentioned, it would fluctuate if we decided to look at doing different departments. As the questions that were asked earlier, such departments as Infrastructure, Health and Social Services, Justice, when you compare it to our administrators and people who work in the administration staff, it would be different. It would go up for some. It might go down for others. As I mentioned, we do follow one single industry code, and that is being class 81.

MR. TESTART: Looking at the industry codes, the ferry industry pays $4.74. When the Department of Infrastructure is offering their own ferry services, they're paying 88 cents, as the Minister says. From the prospective of the private sector, that that seems to be an unfair rate to be charged. The Minister said he'll take a look at it, but can we get more than that? Can he actually commit to reaching out to the industry and having a real conversation with meaningful engagement with stakeholders who feel that the rate structure unfairly gives government a break when their costs keep going up?

HON. ALFRED MOSES: As I mentioned in answering a previous question, why the rates did go up in 2019, as a government and as one employer, we do and focus on taking care of our employees. We want to promote workplace health and safety right across the Northwest Territories, and people who we do work with. That means that we're taking care of the increased costs of treatment and care for any of our injured workers, and will continue to do that. As a result, we will have to make sure that industry and people who we work with do comply with WSCC codes and standards, as well, so that we know, when they're working for us, that they're complying by standards and legislation moving forward. We will continue to take care of the treatment and costs, but we have to make sure that anybody who works under us as an employer does follow legislation and our standards.

DEPUTY SPEAKER: Oral questions. Member for Kam Lake.

MR. TESTART: Thank you, Mr. Speaker. The Minister seems to be answering questions that aren't being asked. Nobody is asking industry not to pay these rates. We're talking about the rates, and whether or not they can be rebalanced to be fairer, given the government's rate. Florists and yarn and fabric stores pay $2.50, again, compared to 88 cents. Will the Minister sit down with industry and have a meaningful conversation with them so that he can get a better understanding of what their concerns are? Quite clearly, he doesn't get it. Thank you.

HON. ALFRED MOSES: As I mentioned earlier, we do have a governance council that oversees the conduct of business and management of the WSCC. I am not sure if the Member heard me say that in a response to a question earlier. I can inform this governance council, and I am sure they are listening, about having these discussions. I also mentioned that I am at an arm's length in terms of my role as Minister responsible for the WSCC, and we will let the governance council know about these concerns that the Member has and that some of the partners in industry have, that we have had a couple of Members bring up today.

We do take it seriously, obviously. We want to make sure that everybody who does work in the Northwest Territories has the best interests of health and safety of our residents and our employees, and we want to make sure that they understand our legislation. I will make sure that the
Mr. Speaker.

**DEPUTY SPEAKER:** Oral questions. Member for Tu Nedhe-Wiilideh.

**QUESTION 614-18(3): SENIORS’ AGING-IN-PLACE RETROFIT PROGRAM**

**MR. BEAULIEU:** Thank you, Mr. Speaker. I have questions for the Minister of Housing on aging in place. I would like to ask the Minister if there is a plan to expand the program for aging in place beyond where it sits now, that is, $10,000. I would like to ask the Minister if there is a plan to expand that particular program? Thank you.

**DEPUTY SPEAKER:** Minister responsible for the Northwest Territories Housing Corporation.

**HON. ALFRED MOSES:** Thank you, Mr. Speaker. Yes, we just did a presentation to standing committee on the senior planning study. We did mention that seniors aging in place was probably one of our highest programs that has been applied to. On top of that, we are looking at doing a northern housing summit, where we are going to be able to get this kind of information out to all of our leaders, to all of our community members, so that that information can be presented to community members and/or seniors if they want to apply to the program.

In response to that public hearing that we had last week, I had mentioned that we do have to respect our seniors and make sure that they have every opportunity to live in their own independent units, and we will be making sure that we get that information out and sharing it with all residents of the NWT. Thank you, Mr. Speaker.

**MR. BEAULIEU:** Currently the program has a maximum amount of $10,000. My question is more: can we increase that amount? Right now, the idea of aging in place is to age in place. Right? If you don't have the ability to go beyond $10,000, you are not going to allow the senior to age in his home, and that is the idea. Right now we have situations where the budget is maxed, and a person can’t change their heating system, for example, to something more efficient. I would like to ask the Minister if there is a plan to increase the limit on the program, like the amount that an individual can get?

**HON. ALFRED MOSES:** I know that we have had a lot of successful applications with the seniors aging in place programs and whatever programs that they are able to apply for. I know that there are some cases that don't meet that criteria. For this Northern Housing Summit that we are going to have, we have invited the NWT Seniors’ Society, NWT Disabilities Society, and we want to hear any other concerns that they might have had in that case. I can't speak to any case in particular, but I know that it has been a concern, and I think that those discussions we will have at the Northern Housing Summit and come out with some good recommendations and where we move from there. We try to be as flexible as we can when we are working with our residents and our most vulnerable residents.

**MR. BEAULIEU:** I wonder if the Minister would just make a decision on increasing that amount. Right now what is happening is individuals are trying to get some help, they are trying to age in place, but the program is very limited. It does very little to support that individual to remain in the home. Barrier-free, for example, would probably cost $60,000 to $100,000, if that was the extreme, but barrier-free could actually allow individuals to age in place. I wonder if the Minister could just open the program up, make a decision about increasing that number of $10,000 to $20,000, $25,000, whatever the placeholder number can be at this point, but something beyond $10,000. You cannot install a wood stove or a furnace in a house for a senior who has an aging, inefficient furnace or wood stove for $10,000.

**HON. ALFRED MOSES:** When we look at these applications for housing programs, whether it is for seniors or any of our residents, it is on a case-by-case basis. We do have a lot of programs that we can work with our seniors to apply for, and like I mentioned, if this is a big concern, we can take a look into it after the Northern Housing Summit. We want to hear from everybody. We want to hear from the communities. We want to hear from the seniors, disabilities, and make the decisions from them moving on. As I mentioned, we work with all of our residents on a case-by-case basis to address the need. At this time, I can't make that commitment to increase it, but we are pretty flexible in terms of how we deal with certain cases, and we will continue to do that.

**DEPUTY SPEAKER:** Oral questions. Member for Tu Nedhe-Wiilideh.

**MR. BEAULIEU:** Thank you, Mr. Speaker. That is exactly my issue, the inflexibility of that program. The Minister is telling me that they would be flexible. Do the people on the ground, the officers, when an individual applies for a program, just change the program to make sure that the program that they do need is what they get? Do the people on the ground, officers, have that ability to make that change? Thank you.

**HON. ALFRED MOSES:** We do base it on criteria, and as I have said in this House and in meetings, moving material into certain parts of our territory,
because some of them are remote, is a concern. Also, having contractors available to do the job is another concern. There are a lot of things to take into consideration. I will sit down and have a meeting with my staff to see how we can address this, and I am really glad the Member has brought this up and brought it to our attention. Obviously, we do want to have more seniors aging in place. It would be a benefit to them, the culture, traditions, and languages.

Moving forward, I think that we will get more feedback, probably, from the Northern Housing Summit. As I mentioned, we will be inviting Members to attend that. I want to hear from the NWT Seniors’ Society as well as our leaders in the communities on what the priorities are and how we address this. I would like to thank the Member for bringing this to our attention. Mahsi.

DEPUTY SPEAKER: The time for oral questions has expired. Item 8, written questions. Item 9, returns to written questions. Item 10, replies to the Commissioner's opening address. Item 11, petitions. Item 12, reports of standing and special committees. Item 13, reports of committees on the review of bills. Item 14, tabling of documents. Member for Tu Nedhe-Wilíideh.

LETTER FROM THE COUNCIL OF CANADIANS NWT CHAPTER TO MEMBERS OF THE NWT LEGISLATIVE ASSEMBLY REGARDING ENSURING THAT NWT POST-DEVOLUTION LEGISLATION RECOGNIZES UNDRIP, DATED FEBRUARY 15, 2019

MR. BEAULIEU: Thank you, Mr. Speaker. I have a letter here from the Council of Canadians, NWT Chapter. I would like to table it. It is on "Ensuring the NWT post devolution legislation recognizes UNDRIP." Thank you.

Notice of Motion for First Reading of Bills

BILL 40:
SMOKING CONTROL AND REDUCTION ACT

HON. GLEN ABERNETHY: Mr. Speaker, I give notice that, on Wednesday, February 27, 2019, I will move that Bill 40, Smoking Control and Reduction Act, be read for the first time. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Notices of motion for first reading of bills. Minister of Health and Social Services.

BILL 41:
TOBACCO AND VAPOR PRODUCTS CONTROL ACT

HON. GLEN ABERNETHY: Mr. Speaker, I give notice that, on Wednesday, February 27, 2019, I will move that Bill 41, Tobacco and Vapor Products Control Act, be read for the first time. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Notices of motion for first reading of bills. Item 17, motions. Item 18, first reading of bills. Minister of Environment and Natural Resources.

First Reading of Bills

BILL 38:
PROTECTED AREAS ACT

HON. ROBERT MCLEOD: Thank you, Mr. Speaker. Mr. Speaker, I move, seconded by the honourable Member for Yellowknife South, that Bill 38, Protected Areas Act, be read for the first time. Thank you, Mr. Speaker.

DEPUTY SPEAKER: The motion is on the floor and non-debatable. All those in favour? All those opposed? The motion is carried.

---Carried

Bill 38 has had a first reading. First reading of bills. Minister of Environment and Natural Resources.

BILL 39:
ENVIRONMENTAL RIGHTS ACT

HON. ROBERT MCLEOD: Thank you, Mr. Speaker. Mr. Speaker, I move, seconded by the honourable Member for Hay River South, that Bill 39, Environmental Rights Act, be read for the first time. Thank you, Mr. Speaker.

DEPUTY SPEAKER: The motion is on the floor and non-debatable. All those in favour? All those opposed? The motion is carried.

---Carried

Bill 39 has had a first reading. First reading of bills. Minister of Environment and Natural Resources.

BILL 41:
TOBACCO AND VAPOR PRODUCTS CONTROL ACT

HON. GLEN ABERNETHY: Mr. Speaker, I give notice that, on Wednesday, February 27, 2019, I will move that Bill 41, Tobacco and Vapor Products Control Act, be read for the first time. Thank you, Mr. Speaker.

DEPUTY SPEAKER: Notices of motion for first reading of bills. Minister of Health and Social Services.

BILL 40:
SMOKING CONTROL AND REDUCTION ACT

HON. GLEN ABERNETHY: Mr. Speaker, I give notice that, on Wednesday, February 27, 2019, I will move that Bill 40, Smoking Control and Reduction Act, be read for the first time. Thank you, Mr. Speaker.
Consideration in Committee of the Whole of bills and Other Matters

MR. BLAKE: Good afternoon, committee. I will now call Committee of the Whole to order. What is the wish of committee? Mr. Beaulieu.

MR. BEAULIEU: Thank you, Mr. Chairman. Mr. Chairman, committee would like to consider Tabled Document 322-18(3), Main Estimates, 2019-2020, with the Department of Infrastructure and Industry, Tourism and Investment. Thank you, Mr. Chairman.

MR. BLAKE: Thank you, Mr. Beaulieu. Mr. Beaulieu.

MR. BEAULIEU: Sorry, Mr. Chairman. I missed one. We would also like to consider Bill 32, Naturopathic Professional Statutes Amendment Act. Thank you, Mr. Chair.

MR. BLAKE: Thank you, Mr. Beaulieu. We will continue after a short recess. Thank you.

---SHORT RECESS

CHAIRPERSON (Mr. Blake): Committee, we have agreed to consider Bill 32: Naturopathic Profession Statutes Amendment Act. I will ask the Minister responsible for the Bill to introduce it. Minister Abernethy.

HON. GLEN ABERNETHY: Thank you, Mr. Chair. I am pleased to introduce Bill 32, the Naturopathic Profession Statutes Amendment Act. The Legislative Assembly passed the Health and Social Services Profession Act to enable the Government of the Northwest Territories to regulate numerous different professions under one legislative framework and later amended the legislation to strengthen competency requirements for professionals.

Work has been under way to draft professional regulations to bring the Health and Social Services Profession Act into force. This includes regulations for three groups of professionals; the emergency medical service providers, naturopathic practitioners, and psychologists. We expect that the Health and Social Services Profession Act will come into force later this year with the regulation of EMS providers, followed by naturopathic practitioners, and both will be newly regulated professions in the Northwest Territories.

Some of the Members may recall that naturopathic practitioners were added to the list of professions to be regulated under the Health and Social Services Act in February of 2014. This decisions was supported by requests from MLAs, members of the profession, and by the 17th Legislative Assembly Standing Committee on Social Programs. Regulating a profession helps ensure the safety of the public, as it establishes rules and requirements for how a profession must practise, train, and conduct themselves.

Since naturopathic practitioners are not currently regulated in the Northwest Territories, there are very few parameters for how the profession can practise. Once regulated, naturopathic practitioners would be subject to complaints and disciplines processes if a patient, a member of the public, another professional, or a complaints officer files a complaint.

Prior to bringing these regulations into force, consequential amendments must be made to the Medical Profession Act, the Pharmacy Act, and the Public Health Act. As regulations do not have the authority to amend or repeal an existing act, the department is putting forward this bill to address the consequential amendment required by the new Naturopathic Professions Regulations.

The proposed amendments will:

- allow persons who are entitled to practise under the naturopathic profession regulation to use the title of Doctor or the abbreviation "Dr." in accordance with the regulation;
- exclude naturopathic professionals from the Medical Professions Act;
- replace the term "naturopath" with the term "naturopathic doctor" in the definition of the personal services establishment under the Public Health Act; and
- allow pharmacists to accept a prescription issued by a naturopathic practitioner who is entitled to prescribe a drug.

The change to Bill 32 will not come into force until the regulations have been finalized and are ready to come into force.

This concludes my opening remarks, and I will be pleased to answer any questions that the Members may have. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Minister. I will now turn to the chair of the Standing Committee on Social Development, the committee that considered the bill, for opening comments. Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair. The Standing Committee on Social Development concluded its review of Bill 32: Naturopathic Profession Statutes Amendment Act on February 14, 2019, with a public hearing held at the Legislative Assembly building.
Six members of the public were in attendance at the hearing, and committee received submissions from Nicole Redvers, a naturopathic doctor. She expressed support for this legislation and was pleased to see naturopath established as a regulatory profession within the NWT. Committee agrees and also supports the bill as outlined by the Minister. Individual Members may have additional comments or questions as we proceed with consideration of this bill. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, chair. Minister, would you like to bring witnesses into the Chamber?

HON. GLEN ABERNETHY: I would, Mr. Chair.

CHAIRPERSON (Mr. Blake): Sergeant-at-Arms, please escort the witnesses into the Chamber. Minister, please introduce your witnesses.

HON. GLEN ABERNETHY: Thank you, Mr. Chair. With me today are Christina Brownlee, who is legislative counsel, and Gary Toft, the director of policy, legislation, and communications with Health and Social Services.

CHAIRPERSON (Mr. Blake): Thank you. I will now open the floor to general comments on Bill 32. Is the committee agreed that there are no further general comments?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Thank you. Committee, can we proceed to a clause-by-clause review of the bill?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Thank you. Committee, can we proceed to a clause-by-clause review of the bill?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Committee, we will now defer the bill number and title until after consideration of the clauses. Please turn to page 1 of the bill. Clause 1?

---Clauses 1 through 4 inclusive, approved

Committee, to the bill as a whole, Bill 32?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Does committee agree that Bill 32: Naturopathic Profession Statutes Amendment Act is now ready for third reading?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Thank you, committee. Bill 32: Naturopathic Profession Statutes Amendment Act is now ready for third reading. Does committee agree that this concludes our consideration of Bill 32: Naturopathic Profession Statutes Amendment Act?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Thank you, Minister. Our thanks to your witnesses. Sergeant-at-Arms, please escort the witnesses from the Chamber. Thank you, committee. We will now proceed to consideration of the main estimates, Tabled Document 322-18(3), Main Estimates, 2019-2020. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Thank you. We will consider with the Department of Infrastructure. Minister, would you like to bring witnesses into the Chamber? Thank you. Sergeant-at-Arms, please escort the witnesses into the Chamber.

CHAIRPERSON (Mr. Blake): Thank you. Minister, please introduce your witnesses.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. On my left is director of Corporate Services, Vince McCormick, of Infrastructure. On my right is Paul Guy, deputy minister of Infrastructure. On my far right is Jaylene Robertson, assistant deputy minister of Regional Operations. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Committee, we have agreed to resume corporate management, operations expenditure summary on page 239. Any questions from committee? Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chairman. When we left off, I think one of the Members was starting to talk about some of the concerns that committee has raised in the past with regard to the centralization of some of our government departments. While it is appreciated that we are building some efficiencies and ways to be effective by doing some amalgamations, the concern lies that, over the years, as we have begun to kind of centralize human resources finance, procurement, and even IT into these centralized government departments, the concern is that a number of the departments and particular regional offices have started to lose the ability to build and maintain the relationships that they have had for a long time with contractors, consultants, and maybe other community partners.

I would like to ask the department, in particular the Minister, because Infrastructure is one of these amalgamation departments and they also seem to be the big spender, I respect and appreciate that, you know, they are tied heavily with the federal funding contributions, and that is well appreciated. I would like to ask the Minister if the department is doing any kind of observation or measuring of what the impacts of these recent amalgamations and
centralizations are having on some of the regions and other departments that this department serves, because this is a department that serves other departments of the Government of the Northwest Territories? Thank you, Mr. Chairman.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. I don't think the amalgamation of these two departments in particular has affected that. We have so many regional people out there who interact with the general public and the contractors on a general basis, that either it be procurement or superintendents who are on the ground that deal with contractors on a day-to-day basis. Nothing has come to my attention that clearly made this amalgamation detrimental to the contracting side of things, as far as I am concerned. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chairman. I appreciate that that is the opinion of the Minister, and we have seen some concerns from other departments whereby the ability of a department, for example, that used to once be able to put out its own procurement and be able to hire its own workforce, be able to manage its own accounts receivables and payables and its own procurement, it is now a challenge to do that because we have essentially taken are of those abilities and centralize them into -- maybe, I guess, the question is something that I will reiterate again later when we meet with Finance. It might be better suited there. I apologize, Mr. Chair. I am going to defer that question until a later time with the Department of Finance. Thank you. For me right now with the activity of corporate management, I have no further questions. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Would you like to comment, Minister Schumann?

HON. WALLY SCHUMANN: I guess the one thing I would like to add to that is one thing that we did in this government, too, is we added a whole new region in the Northwest Territories and in the Sahtu, which, you know, there was some strong support from the Member from the Sahtu region to make them their own region. I think, as we are moved forward with five strong regions, the regional support has just gotten better by doing that, as well. That is just an extra comment I wanted to add. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Any further questions, committee? If not, I will read the page. Infrastructure, corporate management, operations expenditure summary, 2019-2020 Main Estimates, $10,715,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Thank you. Next, we have Infrastructure, programs and services, operations expenditure summary from pages 242 to 246. Any questions? Mr. Testart.

MR. TESTART: Thank you, Mr. Chair. I note that this activity includes procurement shared services. I would like to know: what funding is being put in place to enhance the department's outreach to clients through procurement shared services to better understand the GNWT's procurement system? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. In this budget, there is funding to support a number of outreach programs that we do through procurement shared services. We deliver workshops for businesses and local governments. Over the past year, we had 60 participants attend these workshops from across the territory.

If I go back, and we are still tabulating information for this fiscal year, for 2017-2018, we delivered 18 workshops to businesses on how to do business with the GNWT, which 200 participants attended. We do those workshops in the regional centres or anywhere there is a request to hold a workshop in the Northwest Territories. These things cover things on how to bid on GNWT tenders, how to use the contract and opportunities website, any changes that are made in procurement policies and guidelines, and how to fill out forms and follow some of the preference programs. We also deliver programs and training to our own employees. We have held 83 procurement employee training workshops in 2017-2018, where over 690 employees participated.

A number of these things, we also reached out to the construction community and the contractor community, and held workshops with the construction associations, the engineer associations, the consulting engineers, and Arctic Association to review the approved capital plan once it has been passed, so that vendors and contractors have an idea of what the contracting opportunities are coming up. Those things are all base funded in this budget under procurement shared services. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Testart.
MR. TESTART: If I could just get some information clarified: I heard both 60 participants and 200 participants for the last fiscal year. Which number is accurate? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. In 2017-2018, for How to Do Business With the GNWT, there were approximately 200 participants in 18 workshops. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Testart.

MR. TESTART: I don't know if the department has this information on hand, but what, statistically, does 200 participants represent? How many clients is the GNWT doing business with in a given fiscal year? Is 200 close to a majority, or is this just a sliver of the overall economic field? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. I don't have that number. It is a number that we would perhaps be able to get by looking to see how many registered persons or businesses are on our procurement opportunities website. That would one way to find that. We could do that, and that would give some idea of what the quantum is, but we don't have a number of how many particular people participate in any particular organization, there could be a number of employees that could be registered or participating. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Testart.

MR. TESTART: Thank you. That would be helpful. Can the Minister commit to doing that, and further include to do more of a qualitative analysis of whether or not this procurement outreach is working? It is fine to log participants and meetings, but those are all output-based metrics. If we don't know that 200 participants is statistically important to easing understanding of our procurement policies within the business community, it is just a number. Can the department commit to putting more qualitative analysis towards this exercise and reporting on it annually, either in business plans or some other mechanism that the Minister feels is appropriate? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. The Member makes it sound like we are in dire straits here in procured shared services, and that is clearly not the case. He and I have argued this on the floor of the House a number of times. The department is working on stuff. We made improvements to the RFP evaluation process. We do mandatory customer service training and fairness advisory training with all of our staff. There are a number of things that we continue to work on, and we continue to evaluate on procured shared services moving forward. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

MR. TESTART: Thank you. Apart from this kind of standard outreach, what other client-facing positions and programs are supported in this budget? The Minister is well aware that I and others of my honourable colleagues have brought numerous procurement issues to his attention, and he does not seem to be aware of them before they come on the floor of the House. What is the department doing to address that? There are a lot of concerns out there. They don't seem to be reaching the Minister's ears. How is this budget improving either a complaint process or some client-facing service officer who can listen to these concerns and adequately move them up to chain of command so that they can get properly addressed? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

MR. TESTART: Thank you. I wasn't asking a policy question, but I appreciate the Minister's comments. I think there is more room to go. Are there client-facing service officers attached to procurement who can listen to concerns from the public directly? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Testart.

MR. GUY: Thank you, Mr. Chair. We do have our front-line procurement officers that answer the phone, answer questions, and deal directly on a day-to-day basis with the vendors and the contractors when they are participating in a procurement process. Those front-line staff are available to answer questions and look into or address any concerns that the vendors and clients have. There are also opportunities through the director of procured shared services. He will often
field questions from clients or from contractors around matters related to procurement.

On a more formal basis, working with the Department of Finance, a vendor complaint process was also put in place. Where vendors have issues with the procurement process or fairness around a particular procurement event, there is a formal process where they can bring it forward and get their concerns addressed as well.

There are many opportunities where people can raise their concerns in the department around issues related to procurement. There are also opportunities through the Comptroller General's Office in the Department of Finance, who has ultimate oversight over procurement policies and procedures. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Deputy Minister Guy. Mr. Testart.

MR. TESTART: Thank you, Mr. Chair. Thank you for the response. It was very thorough. Where are these positions located? Are they all in headquarters, or are there also regional front-line client service officers? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. We have procurement officers in Fort Smith, Hay River, Inuvik, and, I believe, Fort Simpson. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Testart.

MR. TESTART: Noticing the time, I will just be quick if you will allow me one more question. A lot of the procurement really depends on local knowledge, knowing who the vendors are, knowing what they offer, and knowing what their issues are. Is the department planning on adding additional front-line officers in the regions, especially the new Sahtu region, the Beaufort-Delta? Is that something that the department will consider? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. What we do is we look at where the resources are required based on the demand, and certainly, in future business plans, if we see a need to have additional resources there, we would bring forward for the forced-growth process to add additional procurement officers in some of those other centres where the demand for the service is there.

We have put a lot of work into increasing our online presence as well and working with some of the procurement software that is being developed with the Department of Finance to make it easier for people anywhere in the territory to access the procurement office and procurement services as well. We are looking at increasing our telephone support as well. Our regional staff, our regional superintendents, also provide a front-line opportunity for regional contractors and regional businesses to access the department as well. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Next on the list, we have Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. On the first line on page 243, on air, marine and safety, could the Minister give a little bit of detail on that? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. That is the division that provides the oversight on our airports program, our ferries program, and overall OHS safety within the department. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. Thanks for that. Four lines down to energy, there seems to be an increase from 2017-2018 to 2019-2020. Could the Minister give a little bit of information on that, please? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Mr. Schumann.

HON. WALLY SCHUMANN: The main one there is going to be the Low Carbon Economy Leadership Fund for $6,746,000. There are a bunch of things that are broken down in there that we have shared with committee: the Government Greenhouse Gas Grant Fund, the Large Scale Commercial and Industrial Greenhouse Gas Grant Fund, incremental Arctic Energy Alliance funding, and Active Forestry Carbon Sequestration, and then there is also delivery of Investing in Canada Infrastructure plan. That's it. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. Thanks to the Minister for that. Getting back to that, you talk about the Arctic Energy Alliance. There's $1.6 million. I know it's run not by the government, but for the government. Mr. Chair, I think a good thing for the Minister and his department to look at is there are other types of alternative energy. When it comes to that, I think the territory, but Canada as a whole, is far, far behind. This is not coming from
myself. This is coming from some constituents who complain that the Arctic Energy Alliance, it's an expensive way to hand out efficient light bulbs and things like that. Like, I said, that's not coming from me. I just might be putting a little bug in the Minister's ear to look at that program, and see how we could advance that in the territory. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. One of the things that we did in the last little bit is we did a program review of Arctic Energy Alliance. We've updated committee on that to restructure that, to see that we -- this is a public facing energy efficiency and conservation renewal alternative energy program for the residents of the Northwest Territories. We wanted to make sure that these new programs lined up with the needs of the funding that we received, and we've rejigged a good portion of it. With the additional funding that we've got, we'll be able to expand some of our programs, and I believe that some of the stuff that we've reallocated money to will put pressure on us in the House here because some of these programs are tapped out so early. I think it's a good fit now going forward, and we've got some stable funding for a number of years to help residents of the Northwest Territories to be able to access these programs. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. I appreciate that. That's a good response. On the next line, I know MTS, I gave the Minister a hard time last year on MTS, and I know it's not an easy undertaking to take over something like that, and it takes multiple departments to make it work good, and I commend the department for that, actually. I see that there's no funding for the next couple of years. Coming with that, the cost of fuel has risen up in our region. I'm just wondering if the Minister can shed some light on that, looking forward into 2019 and 2020 and the year after? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. The reason there's no line item here is because it has a revolving fund now, so now, as most Members know, this thing has to run on its own merit, which we've been successful in the last couple of years.

To answer the question about what we're going to do going forward, we've recently sent a letter to committee outlining our services update, what we want to do going forward, and lay out some of the stuff that we've done in the past calendar year with the Marine Transportation Services Initiative. Yes, we were challenged this year, as pretty much everybody knows. I've been asked a number of questions in the House. I've been asked on national television about the circumstances around the sea ice challenges that we've had.

To update committee, the letter that we sent there, we're looking at a number of things to help make the resupply a lot, you know, lesson-learned. I guess, from last year. One of the ones we're trying to do is move up our schedule a little bit earlier in the year to supply the communities. Now, that's easy enough said. That's going to be conditional on sea ice again. We're working very closely with the Canadian Coast Guard to help them with the monitoring of ice, and what kind of services they can provide us with. Also, the other side of it is the fuel supply. Last year, we ran into some conditions with the supplier having the fuel supplied in a timely manner, and these are things that are subject to getting these things to the community earlier than later. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. I appreciate that response. Last year was a tough ice year, and Transport Canada forecasts 2019 to be an even worse year. It's good to hear that the Minister is looking at plans to serve the communities, and hopefully sooner, if we can. I know, during last year's sitting, I asked the Minister about plans for Inuvik and Tuktoyaktuk, and I'm just wondering, I know this is an O and M budget, but I'm just looking to see where they are on that aspect from a 30,000-foot view. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. We are having a look at Inuvik and Tuktoyaktuk from an operational perspective of what we can do in the long-term to possibly help mitigate some of these circumstances that can arise from sea ice challenges, or even fuel shortages. One of the things I think that we need to have a look at, and the department is looking at scoping out, is what infrastructure do we have in place in those two communities, and what would need to be put in there to help mitigate the factor, particularly around the resupply of fuel and the storage capacity that we have in these two communities. That's part of our operational review that MTS is continuing to look at. Thank you, Mr. Chair.
CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. I appreciate that. Looking at that, talking about fuel, fuel services and long-term plans, there's a lot of infrastructure up in the North that we don't see as civilians. There are radar sites and other types of infrastructure that need heating and need fuel for transportation. It might be worth something in the long run for MTS to think about that, and possibly take other contracts rather than just the territory on a much bigger, bigger scale as the Arctic opens. I just want to hear what the Minister has to say on that. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. As I've been questioned in the House last shipping season about what we were doing around some of this commercial activity that we are doing, MTS is going to continue, of course, to contract with Imperial Oil to supply and deliver fuel to Norman Wells. That's in place, and it is there for a number of years going forward.

We are laying out what our marine charter services and support are going to be going forward, and one of the things that we are looking at is how can we support the federal government with the North Warning Fuel Supply program in the Western Arctic. Those discussions are ongoing for sure.

We are going to probably end up going back to Prudhoe Bay this year. I think we have some interest in delivering some natural gas production models up there. We've got to continue to look at these sorts of things. A lot of people had the confusion last time going around that we are looking after industrial customers without looking after ourselves first, and that's clearly not the case. I've clearly laid that out in our public briefing. One of the reasons we want to get these new double-hulled barges is so we can make fewer trips to service the community. Right now, the way it's laid out with the barges that we have, we've got to make multiple trips to go there. When we get the possession of our new double-hulled barges, the four of them that the tender just closed on here recently that we're evaluating, it's going to help us do the seasonal marine resupply program in a better manner. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. That's good to hear, actually. Having that little bit of infrastructure could probably go a long way to serving the coastal communities, and even outside the territory, and outside the country. I appreciate the hard work that they're doing as a department to refine something that was working, but barely working by a shoestring. Other than that, I don't have really anything else for this section, Mr. Chair. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Comment noted. Next, we have Mr. McNeely.

MR. MCNEELY: Thank you, Mr. Chair. My question is related to pages 244 and 245. I notice quite a variety of different programs with budget amounts to them. I recall this government in previous Assemblies conducted a geothermal potential study from the many federal low-emission green funding sources. Have there been any discussions with the federal government to secure funding for a pilot project related to the geothermal? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McNeely. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. The short answer is no. A number of years ago, there was a proponent that approached the Government of the Northwest Territories to do something in the NWT, but it didn't turn out to be a viable project. With the technology and with the depths they had to drill, it wasn't viable at that time, but the short answer is no. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. McNeely.

MR. MCNEELY: Nothing further there, Mr. Chair. That was just one that caught my eye that could be potential cost-savings for our buildings, as well as subsidizing the private sector buildings. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McNeely. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. When you look at our 2030 Energy Strategy, the way that we have laid that thing out, we have our three-year rolling plan going forward. The reason that we have done this is just because of new technologies and things changing out there. More study and more data is needed to better understand the geothermal resources in the Northwest Territories. With that being said, this is a 10-year plan rolled out by the federal government. There may be opportunities to have a look at the geothermal situation in the Northwest Territories. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Next on our list, we have Mr. Thompson.
MR. THOMPSON: Thank you, Mr. Chair. In regard to fuel services here, I noticed that, when the Minister talked about MTS, there was no budget line, but fuel services has a budget line. Isn’t fuel services a revolving fund, as well? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Mr. McCormick.

MR. MCCORMICK: Thank you, Mr. Chair. Yes, the line for fuel services is related directly to the amortization of the GNWT’s assets that fuel services uses.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McCormick. Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair. Could the Minister explain when our amortization of the tanks are going to be up? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Mr. McCormick.

MR. MCCORMICK: Thank you, Mr. Chair. I don’t have a complete list of the tank farm assets in front of me right now. That equipment amortizes anywhere from 15 to 40 years, depending on the nature of the equipment. They will slowly drop off over a number of years, and as assets are upgraded or replaced, new amortization will hit the budget line. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McCormick. Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair. In regard to fuel services, I have noticed that we have had problems with MTS, given the High Arctic and that, with the smaller communities just recently, i.e., Wrigley. Has the cost gone up, or is it just because of our ice conditions. Did that have an impact on the cost of fuel for Wrigley, we had to get fuel from the north part because of our ice conditions. Did that have an increase in the cost, or were we able to keep the cost where it was until we were able to ship in a new supply? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. The community dispensing contracts and operating the tank farm contracts come up periodically. Every community is on a different cycle. They are usually two- or three-year contracts. We advertise them publicly. We give contractors in the community an opportunity to participate and respond and submit compliant bids. It depends on what the bid price is that comes in of the successful proponent, which is then factored into the price, and that can trigger a fuel price upgrade.

In some of the communities that are just subject to road delivery, we resupply a community, and there have a different price in the fuel if the price of wholesale fuel goes down or goes up. That can trigger a new price as well. We try to test the prices as soon as we have a new cost component available to input into the pricing. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Thompson.

MR. THOMPSON: Thank you. I appreciate that answer from the deputy minister. I know that, in Wrigley, we had to get fuel from the north part because of our ice conditions. Did that have an increase in the cost, or were we able to keep the cost where it was until we were able to ship in a new supply? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. I don’t believe there was any impact on the cost of fuel for Wrigley, bringing it down. I believe we brought it from Tulita or Fort Good Hope on the winter road. That fuel...
was procured back in the summer and was probably at the same or slightly less of a price than the fuel that we had already planned to bring in through the normal resupply route. I think it turned out to sort of break even when you add the transportation cost to the fuel, but we will have to confirm that. As far as I know, there were no impact on fuel price in Wrigley as a result of that movement. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair. I think you are correct that it didn't. I just wanted to clarify that. The next question I have in regard to fuel supply is the quality of it. Is it the same quality across the North when we resupply the communities? Is the fuel different? I have heard some concerns from constituents, who say, "Well, we get the fuel we get. It costs us X amount of dollars. We only get X amount from our tank." In Fort Simpson, the quality of gas seems to be a little bit different. When we go down south, you get a quality difference. Can you verify that the gas that we provide is all the same? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. The fuel that we provide for the petroleum products or through the fuel services division is of the same quality and standard everywhere in the territory. We have a rigorous testing program in place, where we test it at various points in the supply chain. During its final delivery into the tank farm, into the community, we have a regular testing program as well, to make sure that it meets the specifications that we specified when we purchased it. We do that on an ongoing basis as part of our maintenance and operating plan for the fuel services division. It should be the same quality of fuel in any of our tanks anywhere in the territory. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair. My next question is about MTS. We talked about amortization for fuel services, but do we have any amortization for MTS and the stuff that we have purchased? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Mr. McCormick.

MR. MCCORMICK: Thank you, Mr. Chair. The MTS revolving fund records and discloses its own amortization, so there was no appropriated line in the budget. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McCormick. Mr. Thompson.

MR. THOMPSON: Thank you. I guess I am confused. When we have fuel services, we have amortization in the budget, and then, when we have MTS, we don't have it in there, and both of them are revolving funds. Could you explain the rationale for the difference in that? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Minister Schumann.

HON. WALLY SCHUMANN: I will start it, Mr. Chair, and then maybe Vince will want to add something. The GNWT owns the tank farm assets. If we were to have that inside the revolving fund for fuel services, the price of fuel would be unaffordable. It wouldn't be attainable, because that would be right down through MTS. This way, it is in the government assets, and it is written down as a government asset versus through the fuel services. I think I have got that right, but I will defer it to Mr. McCormick here to answer it a little bit better. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Committee, please keep the sidebar conversations to a minimum. Mr. McCormick.

MR. MCCORMICK: Thank you, Mr. Chair. Yes, Minister Schumann is correct. It is just the way the assets are disclosed. They are all GNWT assets, but they are not disclosed separately for fuel services on their statements. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McCormick. Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair, and I thank the Minister and his staff for answering the questions. No further questions on this one. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Next, we have Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chairman. I will go to pages 244 and 245, where we have a number of the programs that we contribute to described, in particular, the NWT energy efficiency projects. It seems as though we contribute about $300,000 to this each year. It is where the department works with the Power Corporation to integrate residual heat, variable-speed generators, and other efficiency technologies that could reduce fossil fuel consumption.

The Minister is aware of SSI Energy coming to the Standing Committee on Economic Development and Environment and putting forward a presentation that described some new technologies, to some degree a new technology,
but, you know, these were technologies that are fairly well known and fairly well utilized by other means. When you bring them all together, they can do wonders in terms of reducing energy consumption and fuel usage in communities, so I am wondering if the department is taking any consideration into either working with corporations such as SSI or ATCO or others that could form microgrids and/or district energy systems to help get some of the thermal communities off of the use of really large single heavy-duty generators and get down to a system where we can utilize the energy and the fuel more efficiently. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. I have met with Mr. Philipp myself a number of times. It will be either around his battery initiative that he is working on or his proposed idea of centralized heat within a community and electricity. We have had a number of discussions with him. I have asked him to sit down with our director of energy and have those conversations to kind of dissected a bit. As I have said in the House, when I talked to Mr. Philipp, I was a little bit concerned about the size of the project and the amount that he wanted to chew off at once. Even, I was a little bit concerned about the community, that, even though he's very passionate about Fort Providence, I was a little bit concerned about the community, that, even though it and suggested maybe have a look at a little bit smaller tighter knit community, where some of these things could be done in a more economic fashion.

I like Jeff's concept. I think there is a possibility that something can be worked out in a manner that could work in one of our smaller communities. We will continue to have those discussions with him, but when you have a look at what he was trying to do all at once, I think it is a bit much. It hasn't been quite proven everywhere. He has, in theory, I think, and I am not an expert on this, but when you look at the multiple generators that he wanted to lay out throughout the community and the electricity aspect of it, I said, you know, one of the concerns I’ve got going forward and when you look at our energy strategy 2030, our three-year rolling plan, I said we are going to put a T-line into Fort Providence and put them on hydro, so does it clearly make sense to have a community that is going to be on the hydro system have diesel generation there for electricity? Central heat is something that is intriguing, but I know the details would have to be worked out around that, around cost effectiveness, about the length of line, about capturing the amount of BTUs from the source point to the building, and what would that entail, and the cost factors of that, and the layout of the community, as well.

That being said, as we have said, our energy strategy is a three-year rolling plan, and I will continue to look at these types of initiatives. We have made the commitment. We need to lower greenhouse gas emissions in the Northwest Territories. It would be around central heat or building efficiencies or electrical generation, and we will continue to work with these proponents going forward. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chairman. I really appreciate that the Minister is well in tune with Mr. Philipp's presentation and the concept of the microgrid and the district energy system, but one of the key pieces of that presentation was the idea of just simply getting a community, a large community, off of one large generator that runs full bore 24/7, 365, and getting it replaced with multiple smaller generators. Never mind the other aspects of, you know, graphene batteries or heat exchangers or what have you, just the idea of getting one large massive generator off and putting smaller ones in so that you can only have as many generators running as you need to cover the load that is required at the time, is there some thought being given to us putting some idea into future, replacement of our big, old, large generators into using this smaller multiple-generator system? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. I just caution Members: try not to mention any names for future, but we will go on to Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. As I have said, you know, I am very interested in what Mr. Philipp is doing. Oh, sorry. Thank you, Mr. Chair. We are interested in looking with a number of proponents who brings these ideas forward with us. As I said, our strategy is a three-year rolling plan. Things are going to change. These types of ideas are out there. There are a number of people who have approached us on a number of ideas on what we can do in the communities, be it biomass or gasification. There have even been conversations about mini-nuclear and all these sorts of things. We have to be open-minded on moving this initiative forward, of lowering greenhouse gas emissions. The Premier has clearly signed on to the Pan-Canadian Framework on Clean Growth and Climate Change with the Prime Minister, and we have lined up our strategies and our federal funding to try to be able to achieve these things, so we have to be very open-minded on going forward. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Vanthuyne.
MR. VANTHUYNE: Thank you, Mr. Chairman. The $300,000 that is identified here seems like it is a contribution that we make every year to help the Power Corporation in regard to this. Can the Minister give us a little bit of a description on what is being done this year or what projects we might see some improvements, maybe a variable-speed generator or some other integrated residual-heat system completed with this year with this $300,000? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. There are a number of projects I believe the department is working with on the NWT Power Corporation, and I think that refers to one of the solar projects in the Sahtu. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. Vanthuyne.

MR. VANTHUYNE: Okay. That is great to hear. It is good to know we are making those kinds of investments in renewable alternative energies. No further questions in this activity. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Any further questions, committee? Seeing none, I will call the page. Infrastructure, programs and services, operations expenditure summary, $31,885,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Thank you. Next, we have regional operations, operations expenditure summary, from pages 247 to 249. Any questions from committee? Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chair. Since Yellowknife is considered the North Slave district, let's start by confirming: can the Minister confirm that resources are in this budget for the roadside turnout at Big Hill Lake? I believe there were going to be some resources set aside for some predesign, et cetera. Can the Minister confirm that? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Schumann. Mr. Vanthuyne. Since Yellowknife is considered the North Slave district, let's start by confirming: can the Minister confirm that resources are in this budget for the roadside turnout at Big Hill Lake? I believe there were going to be some resources set aside for some predesign, et cetera. Can the Minister confirm that? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Schumann. Mr. Vanthuyne.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. To inform the Member, in this budget year, particularly around the Norman Wells Health Centre, there is $196,000 that is going to be put in there for O and M and upgrades and stuff going on there with the assets. There are two people who are going to be hired in the Sahtu region primarily to support the region. There is going to be an operating engineer and a plumber being hired on staff to dedicate some forces towards the Norman Wells Health Centre. Ongoing training is also another aspect that will continue as we further evolve with our staff on that building. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. McNeely.

MR. MCNEELY: Nothing further, Mr. Chair. Thank you. It was brought to my attention, so I am satisfied with the reply. Thank you very much.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McNeely. Next, we have Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Presently, we are working with our own forces internally with the design on this thing. We are working closely with ITI on it, as well. When it comes time to build this, we will be coming forward with appropriate appropriations to build that. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McNeely. Next, we have Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. I have some questions about the revolving funds. Is this the appropriate place to ask them?

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Mr. Guy.

MR. GUY: The question was to the chair, Mr. Chair.

CHAIRPERSON (Mr. Blake): Say again, Mr. O'Reilly.
MR. O’REILLY: Thanks, Mr. Chair. I think it is actually the next section. When can I ask some questions about the revolving funds?

CHAIRPERSON (Mr. Blake): Mr. O’Reilly, right now, we are on page 247 to 249. Then we will do the information items. Once we finish this section, then you could ask questions on the information items. Next, we have Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair. Hopefully, this will be really quick. In regard to highway operations, I am assuming this include winter roads in this section? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Minister Schumann.

HON. WALLY SCHUMANN: Yes, it does, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Thompson.

MR. THOMPSON: Thank you, Mr. Chair. In regard to the Sambaa K’e winter road, again, it is the question about the hills there. Have you identified money to help them with two hills for this fiscal year, or is it the past fiscal year? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. I think, when the Member asked me in the House about this particular question, I said that we would be working with the community on a CAP application. They have submitted one, and we are working with them to looking at approving to do some work on the winter road this year through CAP. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. That will be this fiscal year. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. That will be this fiscal year. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Thompson. Any further questions committee? Seeing none, I will call the page. Infrastructure, regional operations, operation expenditure summary, $145,523,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Thank you, committee. Next, we have information items from pages 250 to 261. Mr. O’Reilly.

MR. O’REILLY: Thanks, Mr. Chair. Let’s start with the Petroleum Products Revolving Fund. The deficit is sort of jumping all over the place between 2017-2018 and 2019-2020. Can somebody explain what is happening here? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O’Reilly. Mr. McCormick.

MR. MCCORMICK: Thank you, Mr. Chair. On this information item, the 2017-2018 actuals are the only, for lack of a better term, real number on the page. The main estimates for 2018-2019 were what we estimated at that time. Revised are updated to reflect the operations throughout the years. That is roughly where we would be this year. The accumulated deficit is just the accumulated operational surpluses for the year. Basically, they are sort of rolling budgets as we go along. We do the best we can to estimate them. Then once the financial audit financial statements are done, then we would update at that time. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McCormick. Mr. O’Reilly.

MR. O’REILLY: Thanks, Mr. Chair. 2019-2020, it is predicted that the accumulated deficit is almost going to be $1 million. Is that what I am seeing here? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O’Reilly. Mr. McCormick.

MR. MCCORMICK: Thank you, Mr. Chair. Yes, that is correct. The accumulated deficit represents the Petroleum Products Stabilization Fund. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McCormick. Mr. O’Reilly.

MR. O’REILLY: Thanks, Mr. Chair. 2019-2020, it is predicted that the accumulated deficit is almost going to be $1 million. Is that what I am seeing here? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O’Reilly. Mr. McCormick.

MR. MCCORMICK: Thank you, Mr. Chair. Yes, that is correct. The accumulated deficit represents the Petroleum Products Stabilization Fund. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McCormick. Mr. O’Reilly.

MR. O’REILLY: Thanks, Mr. Chair. The MTS expenses that were incurred because of the failure to deliver fuel and other supplies to the coastal communities, is any of that being charged to the Petroleum Products Revolving Fund? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O’Reilly. Mr. Guy.

MR. O’REILLY: Thanks, Mr. Chair. The MTS expenses that were incurred because of the failure to deliver fuel and other supplies to the coastal communities, is any of that being charged to the Petroleum Products Revolving Fund? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O’Reilly. Mr. Guy.

MR. GUY: Thank you, Mr. Chair. Yes, there is.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Guy. Mr. O’Reilly.

MR. O’REILLY: Thanks, Mr. Chair. Well, that was extremely short. Why? Thanks, Mr. Chair.
MR. O'REILLY: Thank you, Mr. Chair. That is kind of a creative way. Look, I don't run these things, but when an expense is incurred because of one operation and it gets charged to another, is that the way we handle this stuff? Thanks, Mr. Chair.

MR. MCCORMICK: Thank you, Mr. Chair. Because the Yellowknife Airport Revolving Fund is a special purpose statement, the accumulated surplus is just shown this way for presentation purposes. The assets are owned by the GNWT, so the actual authorized limit surplus would not include the accumulated surplus for the assets that the GNWT owns. It is just for presentation purposes on the statements. The actual accumulated surplus would be approximately $12.5 million, is what we are predicting for 2019-2020, and with an accumulated real surplus of about $23 million. There would be a significant difference between that and the authorized limit. Thank you, Mr. Chair.

MR. O'REILLY: Thanks, Mr. Chair. Here is my usual statement: if I wasn't confused before, now I am. There is some other imaginary surplus that is not shown on this page. Can the Minister provide this to us? I am looking at what we are supposed to be reviewing, but some other figures are being presented. Thanks, Mr. Chair.

MS. ROBERTSON: Thank you, Mr. Chair. Just an initial comment: Mr. McCormick had mentioned the 2017-2018 actuals. If you look at the farthest right-hand column, you will see the $23 million, which represents the value of the capital assets. The capital assets are actually owned by the GNWT, so they are not actually part of the revolving fund, but they are just shown for informational purposes here. That $23 million is carried forward through the years, which is why you see the $35 million of the
accumulated surplus at end-of-year in the projection of 2019-2020. Now, because those assets aren't owned by the revolving fund, the actual accumulated surplus is $23 million less than that, and it is $12 million. I do understand that it is a little bit confusing, how these information pages have been laid out, and we will be working with the Department of Finance next year to improve how these pages are shown within the main estimates to make it clearer. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Ms. Robertson. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Okay. I think I understand that a little bit better, and a better presentation next year would be helpful. I am concerned that there are growing revenues here that we don't seem to be spending on the Yellowknife Airport. It has grown now by $5 million over two years. Why are we not spending this money on improvements at the Yellowknife Airport? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. The first problem with this page is that it doesn't show the capital expenditures that we are working on. That is the first problem with it, but we are doing a number of improvements going forward. Trust me; we don't want to be sitting on $12 million of cash when we need to do a number of projects that are going to be happening out there at the Yellowknife Airport.

We have our 20-year master plan, our long-term strategic plan, so hopefully we are going to have that completed by spring. We will probably be sharing that, I suspect, with committee at that time as well. We have talked in the House about a number of things, about relocating the oversized baggage facility to the de-icing facility to runway repairs. We had the federal announcement that I did here a couple of weeks ago around the lighting and the investment that they are going to help with. We have got to do our 25 percent with the federal government on that thing. The projects that we have done lately, like the parking lot and the improvements that we have made to the holding rooms and these types of things. There are a number of projects going forward, and as I said, the page doesn't clearly lay out the capital plan going forward. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. O'Reilly, your time has expired. If you want, I can put you on the list again. Thank you. Any further questions from committee on the information items? Seeing none, we will now return to the departmental summary found at page 231.

Infrastructure, total department, $264,013,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Thank you. Does committee agree that consideration of the Department of Infrastructure is concluded?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Thank you. Thank you, Mr. Chair, and our thanks to your witnesses for appearing before us. Sergeant-at-Arms, please escort the witnesses from the Chamber. Thank you, committee. We will now turn to the next department, the Department of Industry, Tourism and Investment. Minister of Industry, Tourism and Investment, would you like to provide comments?

HON. WALLY SCHUMANN: Thank you, Mr. Chair. Yes, I would. I am pleased to present the 2019-2020 Main Estimates for Industry, Tourism and Investment. Overall, the department's estimates propose an increase of $2.9 million or 5 percent over the 2018-2019 Main Estimates.

The estimates include several funding increases to support departmental priorities.

An increase in funding for tourism marketing is proposed to help our highest potential renewable-resource industry continue its growth. Also included is additional funding for parks operations to support their role in this growth while providing high-quality facilities for our residents and visitors.

Funding to implement the Petroleum Resources Strategy, a key element to the Government of Northwest Territories' long-term vision and approach to energy and climate change, is also included in the budget as well as funding to continue the Northwest Territories geological survey's objective to better understand the geology of the Slave Geological Province.

An additional three positions, including operational costs, are included to support our work in developing the knowledge economy, effectively administering mineral tenure, and further supporting our film sector.

As we plan for the up-and-coming fiscal year, the Department of Industry, Tourism and Investment remains focused on the mandate priorities set out by the 18th Legislative Assembly and continues to work to fulfill our commitments.

One of these commitments is to release a Northwest Territories manufacturing strategy, which we are set to fulfill during this 18th Legislative Assembly.
The Department of Industry, Tourism and Investment will be investing in the implementation of its strategy to revitalize commercial fishing on Great Slave Lake.

We will be pursuing MOUs on economic development with Indigenous governments, supporting local food production, and training for commercial farmers.

We will continue to implement the Mineral Development Strategy, most notably through the planned introduction of the Mineral Resources Act and the development of supporting regulations.

In 2019-2020, ITI will also focus on:

- launching a web-based information portal and educational materials for the Resources and Energy Development Information initiative;
- installing renewable energy infrastructure in off-grid campgrounds;
- working with the Department of Lands to develop a land-use tenure approach that will support the agriculture sector; and
- advancing work towards the federal transfer of the proposed Doi T’oh Park.

Of the department’s total proposed budget, 28.7 percent has been allocated to economic diversification and business support, 28.9 percent to tourism, and 27.6 percent is identified for spending in the areas of minerals and petroleum resources.

This concludes my opening remarks, and I welcome questions from the Members. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister. Would you like to bring witnesses into the Chamber?

HON. WALLY SCHUMANN: Yes, I would, Mr. Chair. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Minister. Sergeant-at-Arms, please escort the witnesses into the Chamber. Minister, please introduce your witnesses.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. On my left, I have Nina Salvador, director of finance and administration for ITI. On my immediate right, I have Deputy Minister Tom Jensen. On our far right, we have Tracy St-Denis, assistant deputy minister of economic development. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you. Committee, you have agreed to forgo general comments and proceed directly to the detail for the Department of Industry, Tourism and Investment. Agreed?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): The department begins on page 199, but we will defer the departmental summary and review the estimates by activity summary, beginning at page 207. Industry, Tourism and Investment, corporate management, operations expenditure summary, $8,840,000. Any questions from committee? Seeing none, does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Moving on, we have economic diversification and business support, operations expenditure summary, $17,251,000. Any questions from committee? Economic diversification is on page 209 to 213. Any questions? Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Okay. I will read the page again. Corporate management, operations expenditure summary, $8,840,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Next, we have economic diversification and business support, from page 209 to 213. Economic diversification and business support, operations expenditure summary, $17,251,000. Any questions, committee? Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. On page 211, the Northern Food Development Program, can I just have a little bit of information for that for this year, please? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. The Northern Food Development Program is a program provided by our regional offices, and it supports different program areas, such as fishing. So communities like Tsiigehtchic, where we have commercial fishers or new entrants wanting to enter into that sector, that would be the programming area that their regions would utilize.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. I appreciate that. I don’t know if this is the section. I know Tuktoyaktuk, during last year’s business plans, during sitting last year, there was $100,000 allocated for the community of Tuktoyaktuk to
possibly look at upgrading the current visitor centre that they have there now, which is a shack. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Minister Schumann.

HON. WALLY SCHUMANN: Mr. Chair, can we get the Member to repeat the question? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Nakimayak.

MR. NAKIMAYAK: Yes, thank you, Mr. Chair. Last year, during the last November sitting, there was $100,000 from ITI to help Tuktoyaktuk with the current visitor centre that they have there now. I believe the department had allocated $100,000 to possibly look at upgrading the visitor centre that they currently have in Tuktoyaktuk right now. I don't know if that helps, but I could dig into e-mails quickly here and find out exactly what it is.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Minister Schumann.

HON. WALLY SCHUMANN: From what I know of what is going on with the tourism information centre in Tuktoyaktuk is we are going to help do a feasibility study on the prospect of something happening there, but I think the Member might be referring to something that potentially could be in the capital budget going forward. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Nakimayak.

MR. NAKIMAYAK: Thank you, Mr. Chair. I believe so. I am sorry for my confusion. I don't think I have anything else right now, Mr. Chair. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Nakimayak. Any further questions, committee? Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Given my colleague's last line of questioning, is this where planning studies would fall for the visitor centre, or would it be found in tourism and parks as we work our way through the ITI budget? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. Later in the budget, there actually is a line item that does speak to Yellowknife visitor services, so we would be able to address questions there. I am not sure if that answers the Member's question at this point.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. I will see if I can wait until we get to the end, then. Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Next on our list, we have Mr. Beaulieu.

MR. BEAULIEU: Thank you, Mr. Chair. I have a question on the commercial fishers. It indicates on there that it is to offset the high cost of freight or production costs. Is that for the whole of Great Slave Lake, or is that the whole territory? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Beaulieu. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. That program actually is for those fishers for freight subsidies where fish is actually going to the Freshwater Fish Marketing Corporation.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Mr. Beaulieu.

MR. BEAULIEU: Are the fishers from Yellowknife included in that, or just people from the south of the lake? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Beaulieu. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. That program would be for any fisher who was actually selling fish through the fish plant to the Freshwater Fish Marketing Corporation. We do, however, as mentioned earlier, have the Northern Food Development Program, which would help fishers across the Northwest Territories. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Beaulieu. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. That program would be for any fisher who was actually selling fish through the fish plant to the Freshwater Fish Marketing Corporation. We do, however, as mentioned earlier, have the Northern Food Development Program, which would help fishers across the Northwest Territories. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Mr. Beaulieu.

MR. BEAULIEU: Thank you, Mr. Chair. I have no further questions.
CHAIRPERSON (Mr. Blake): Thank you, Mr. Beaulieu. Next, we have Mr. Testart.

MR. TESTART: Thank you, Mr. Chair. I am just taking a look at these lines, especially around the SEED program, Support for Entrepreneurs and Economic Development, and Community Futures. Let's just talk about SEED. This money has only seen very small marginal increases over the years. I would like to know what the subscription rates for the SEED fund are. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. For the number of years that we have tracked it from 2010 to now, it has either been almost 100 percent subscribed or else oversubscribed. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Testart.

MR. TESTART: How much is it oversubscribed? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: We can supply this chart to the Members, but in 2017-2018, the surplus deficit was $26,888 over. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Testart.

MR. TESTART: Thank you. Sorry, I wasn't looking for deficit numbers, but that is helpful. If the SEED fund had the available funding, what is the amount of applications that would have been approved under those conditions? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: We can supply this chart to the Members, but in 2017-2018, the surplus deficit was $26,888 over. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Testart.

MR. TESTART: Thank you. Sorry, I wasn't looking for deficit numbers, but that is helpful. If the SEED fund had the available funding, what is the amount of applications that would have been approved under those conditions? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. Just to give the Member an idea, I will run through it really quickly. In 2010-2011, we had 418. In the next 2012 calendar years, 448, 437, 454, 480, 410, 441, 445, are the number of applicants, but the number of people approved changes year to year depending on the type of applications that we receive. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

MR. TESTART: Thank you. This funding is crucial capital for entrepreneurs and for businesses that are looking to develop, to grow, and to pursue expansion, and there is just not a lot of private equity out there being floated to northern businesses. I see this fund as a key way that the government can help diversify the economy directly, and yet, we do not see substantial increases to this pot of money.

I recall a couple of years ago when similar arguments were being made to increase the Mineral Incentive Program, which was done, and currently that fund pays out and is contributing a lot to our economy. Why aren't we taking the same approach with this vital fund? The answer, often, when we are raising questions on behalf of our constituents who are looking to access more government support, when we are looking at the general state of the economy, the answer is often, "Go to the SEED fund," and the SEED fund too frequently runs out.

Why are we not putting more resources into this fund, which is a very useful way to contribute to the economy, to diversify the economy, and to get entrepreneurs the capital that isn't as freely flowing to them from private capital institutions? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. As I have said under heavy questioning before, around some of the funding allocations that we try to get for the Department of Industry, Tourism and Investment, we have to do our applications just like all of the other departments and compete with the limited amount of resources that the Government of the Northwest Territories has. That being said, with the amount of money that we have right now for Support for Entrepreneurs and Economic Development in the Northwest Territories and the applicants that we have got, I think that we are doing a pretty good job with the allocation that we have, and we are meeting the needs of Northerners at this point. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Testart.

MR. TESTART: Thank you. I am not disagreeing 100 percent. I think that this is doing a good job. It's just that we could be doing an even better job, and of course, there were changes to SEED that have allowed the program to flow a bit more broadly throughout all of the regions of the territory. Doing the best job that we can with the available resources isn't doing better. We are looking at a future of recession. We are looking at economic hardship ahead. No one denies that. We should be using funding like this and resources like this that, A, we know work; B, we know that entrepreneurs are readily accessing and celebrating the opportunity; and C, we know that a minimal increase over a period of years is going to have large economic impacts and form multipliers.
Will the Minister consider a SEED plan that will see more investment in this fund in the next business plan for a period of years when, again, capital markets are going to contrast even more tightly than they currently are? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. One of the things that we've done, on recommendation from the Regular Members was, we want more data, so we've taken that initiative. We're taking that step to track these programs, and some of the stuff they're doing within our department. We've clearly set out some internal working groups that collect more data for us to be able to make better decisions on, are we getting value for money around these programs that we're in charge of. This is early days of collecting that data, but as I've said, we've got to compete with resources with every other department with the Minister of Finance and make our case for it. I think, once we get more data to support the fact that the points that the Members raise, if they're supportive of what he's saying, then I would clearly support trying to get more money into the SEED program. First of all, we can't put the cart before the horse. They've asked us to get more data, and that's what we're going to do. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Testart.

MR. TESTART: Thank you, Mr. Chair. I would encourage the Minister to move expediently on it. Moving to the Film Industry Rebate Program, Members have had an opportunity to speak with the professional association around the film industry in the Northwest Territories, and also look at how this program performs. It's moved from a pilot project to a full-time funding pool, which is fantastic, but again, this is another one where we see very similar funding allocations year on year. If we want to expand the presence of the film industry, especially down-market production, we're going to need to put more financial resources into the rebate program. That down-market production is where you're going to develop the capacity, the knowledge economy, and create jobs that stick around and aren't brought here just during the production phase. These are media professionals who will stick around. Is there any thought as to either putting more resources into this, or developing new funding criteria to support a downstream production of film in the Northwest Territories? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. One of the things that we've done throughout this year is that we've asked for a film officer, one new position. That's in there. It's clearly laid out, that we wanted additional funding to help support the implementation of the Northwest Territories Film Strategy in its actions to increase marketing efforts to promote the Northwest Territories Film Rebate program and new targeted initiatives that will include annual familiarization tours to attract interest and investment into the Northwest Territories. This position, as I've said, is to help attract investment and interest in the Northwest Territories, and this is going to certainly help the film industry to move forward with this additional position that we've asked for. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Testart.

MR. TESTART: Thank you, Mr. Chair. The Film Commissioner and the office around the Film Commissioner works very hard to do exactly that, and I think the additional support will be great, but marketing and bringing productions here is only half the equation. The way to expand the industry is to actually build that local production capacity so you can have creators and film crews and technicians and engineers and all those people who make movies permanently based here. That's the way we can diversify the economy as well. Local economies in regions that have been successful in this have always built very strong rebate programs. The rebate program we have is great for now and for attracting people to come and make movies here, but if we're going to make our own movies, we need to strengthen it. Is the Minister open to that component of the film industry? Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Testart. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. Ever since I got this file, the film industry has moved a long way. We've done a number of things working with the film Commission and moving the Western Arctic Movie Pictures and NWT Professional Media Association along. We continue to promote them alongside them. As I've said, we've offered this new officer to help them promote the industry in the Northwest Territories. Last year, at their first annual gala, we supported a new apprenticeship program for its members, which was greatly appreciated by the industry. The feedback that I've got from them to help them grow the industry here in the Northwest Territories, this is going to continue to help support those types of programs of them moving forward.

As I've said, we just can't keep throwing money at this. We've got to do our allocation with our Finance Minister to try to get the appropriate funds where the most need is right now in the Northwest Territories, and I think just adding this one position
this year with the limited resources we've got is doing good things for the film industry. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Any further questions from committee? Seeing none, I'll call the page. Industry, Tourism and Investment, economic diversification and business support, operations expenditure summary, $17,251,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Thank you. That brings us to minerals and petroleum resources, operations expenditure summary, $16,569,000 from pages 214 to 217. Any questions from committee?

MR. O'REILLY: Thanks, Mr. Chair. On page 216 under grants and contributions I see the NWT Chamber of Mines for $30,000. When I looked at the 2017-2018 grants contributions report from the department, and I see that the Chamber of Mines 2017-2018 got $190,600. How do we go from $30,000 to $190,000? Because that seems to be a flat line over time, although it was more back in 2017-2018. What else is happening here that the Chamber of Mines is getting money from ITI? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Ms. Salvador.

MS. SALVADOR: Thank you, Mr. Chair. I think what we're talking about is the funding that was paid under the grants and contributions report. Basically, the reason why we have an increased amount in 2017-2018 is that contributions in 2017 and 2018 were to promote the Northwest Territories and all those number of initiatives that were mentioned by the Director of Finance. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Ms. Salvador. Mr. O'Reilly.

MR. O'REILLY: Okay, thanks. I'll see what happens with the future grants and contributions reports. It just doesn't seem to really square up very well. I think this is the part of the budget where, as I understand it, the department is looking at hiring a deputy, an additional deputy mining recorder. Is that correct? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. Yes, it is.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. In the department's business plan which is found on the Department of Finance's website, there's an interesting figure there. It's 12, that shows the number of claims that are in good standing, number of leases in good standing, number of prospecting permits, and virtually all of those have declined from 2014-2015 to 2017-2018. There is this declining trend of either claims being kept in good standing, leases in good standing, number of prospecting permits. Why do we need another deputy mining recorder if all of these trends are in decline? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. No, that is all run through our department. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. How do we go from $190,000 in 2017-2018 to only $30,000 in 2019-2020? That's what's in the main estimates here. Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. That's the answer that Ms. Salvador just gave him. There were contributions for 2017-2018 in order to promote the Northwest Territories and all those number of initiatives that were mentioned by the Director of Finance. Thank you, Mr. Chair.
increase in mineral activity registration transaction plan inquiries, there is a need to ensure that industry clients receive timely approvals of their claims, work-report filings, related transactions, necessary device, and support for their regulatory requirements related to mineral tender and management that is administered by the mining recorder's office are met. The position is intended to provide appropriate support to the mining industry clients. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. The Minister referred to a 165-percent increase in work. That is not what I am seeing on figure 12 in the business plan. As I said, in fact, it is a declining amount of claims that are in good standing, number of leases in good standing, number of prospecting permits in good standing. Everything is declining, so what figure is the Minister referring to? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. I will have to have a discussion with the Member, I guess maybe when we are done business plans, but my numbers clearly show there has been an increase in activity of mineral claims, as I said, 165 percent, 175 percent. Registered document filings are up by 695 percent. There are some serious increased activity within this department. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Yes, well, whatever the figures the Minister has certainly don't square with what is in the business plan where, you know, the number of claims in good standing declined in 2014-2015: 2,256 down to 1,123 in 2017-2018. That is less than half. The number of leases hasn't declined quite that rapidly, but I just don't see an increase in workload here. I don't know what figures the Minister has that I can't see. That is not what I am seeing here, so, if the Minister could commit to share that information with me, that would be great.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. Absolutely, we will share that with the Member. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. I have another question on this one with regard to the Mining Incentive Program. There is a table in the business plan. It's figure 11. That talks about how the money from the Mineral Incentive Program has resulted, at least in the opinion of the department, in a whole bunch of extra spending on mineral exploration. Can someone explain to me what this leveraged spending is all about and why some of it doesn't even occur in the same financial year as the money that is provided? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Mr. Jensen.

MR. JENSEN: I am just looking at the numbers here. Thanks, Mr. Chair. In terms of leveraging, the argument is that we make the argument that, if we have provided mining incentive funds to a particular exploration company or advance exploration company, that the funds that they contribute to exploration would not have happened otherwise. That is why we use the term. We would leverage that money. It is money that would not have been spent if we had not contributed money under Mining Incentive Program.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Jensen. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Yes, I guess I remain to be convinced that the GNWT contributing $400,000 in one year is going to lead to $3.28 million in exploration funding, but I guess at some point I am going to have to meet with the Minister and his staff to get a better explanation because I don't really quite understand or accept some of the figures that are presented here. I am happy to meet with the staff and the Minister if he will make that commitment. Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. Certainly, we can sit down and have a discussion with the Member, but one thing: the Mineral Incentive Program has now $1 million to it. It is not $400,000. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Next on the list, we have Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chairman. I would like to start by asking if the Minister is aware of the Member’s statement that I gave today, talking about the future with potential ownership, of Indigenous groups and governments having potential equity and ownership and mineral development opportunities. I would like to ask a little bit about the Indigenous mineral development support program. It seems as though we have a
running $100,000 that we could put into that program every year. Maybe if the Minister could give us a little bit more detail on what that programs consists of, what its successes have been, and what this $100,000 for this year is allocated to? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Mr. Jensen.

MR. JENSEN: Thank you, Mr. Chair. The monies that are allocated in that part of the budget are for funding Indigenous governments and organizations that are representatives to attend events like roundup and PDAC and those kinds of things. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Jensen. Mr. Vanthuyne.

MR. VANTHUYNE: Okay. Thank you. Just to be clear, this isn't similar in nature to something like the Mining Incentive Program but for Indigenous interests in mineral resource development; as the Deputy Minister described, this is like assistance to help participation at events like roundup? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Mr. Jensen.

MR. VANTHUYNE: Thank you, Mr. Chair. Yes, that is correct. Also, we are working with the Indigenous governments around developing regional mineral strategies. That would be one of the other things that we do. In terms of the Mineral Incentive Program, it is also available to Indigenous exploration or prospectors if they apply for that, so there may be Indigenous folks who are actually accessing Mining Incentive Program funds as well. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Jensen. Mr. Vanthuyne.

MR. JENSEN: Thank you, Mr. Chair. Yes, that is correct. Also, we are working with the Indigenous governments around developing regional mineral strategies. That would be one of the other things that we do. In terms of the Mineral Incentive Program, it is also available to Indigenous exploration or prospectors if they apply for that, so there may be Indigenous folks who are actually accessing Mining Incentive Program funds as well. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Jensen. Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chair. No further questions in this activity.

CHAIRPERSON (Mr. Blake): Okay. Thank you, Mr. Vanthuyne. Any further questions from committee? Seeing none, I will call the page. Minerals and petroleum resources, operations expenditure summary, $16,569,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Thank you. Next, we have tourism and parks, operations expenditure summary, $17,314,000. That is on pages 218 to 221. Any questions from committee? Mr. Vanthuyne.

MR. VANTHUYNE: All right. Thank you, Mr. Chair. Well, I will start like I do every year in this category, by commending the department for a lot of the great work that they have done in terms of the investment to a number of our parks throughout the territory, but, in particular, Ingraham Trail and the numerous recreational parks that we have on that road, as that is in my riding. There have been considerable improvements made in recent years, so I just think it is important to let the department know that that work is well appreciated.

That said, one of the aspects that I want to raise in this department is: I think it was in this budget, during this budget process last year, we talked about the idea of putting a pilot project together where we would open up Prelude Territorial Park Loop C. This was to allow for some tour operators to call it a base where they could host aurora tour viewing. We were going to charge a fee. There were some fairly valid reasons to give consideration to this opportunity, let's call it.

Since that time, I just want to let the department know that we have had some concerns raised by tour operators, especially some of the older, more-established tour operators who have their own leases, their own land titles, their own assets and stuff that they have invested in significantly over the years who have shared with me some concern with regard to this particular pilot project.

While I was in favour of this when we first proposed it last year, and recognizing that it is a pilot project, I am wondering if the Minister and the department can share some insight as to, first of all, how well it is going? How many operators have taken them up on the particular opportunity? What kind of rates are we charging on a daily basis? Maybe we will start there, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. As we said, this is a pilot project that we have initiated. The main reasons we have done this are due to safety reasons, for one thing. There has been so much traffic on the Ingraham Trail. A number of the operators who have been operating out there who don't have access to land are stopping right on the highway and turning their lights off for viewing opportunities. That has created a very big safety hazard. As we know, in the wintertime is the resupply for fuel for the diamond mines. There is an atrocious amount of traffic that is out there.

This is one of the reasons we wanted to do this pilot project. What it has done is allowed up to 30 operators to access sites on the Ingraham Trail out there to get off the highway system. You have to be a licenced operator to do this. There is a fee that is applied to this. It is $2,000 a year, I think, for the
licenced operators to access these sites for winter use. I think it has been a success so far.

Going forward, I hear the Member saying that there are some concerns around some of these older operators. One of the other things that these guys have to be a little more flexible about is there are all different, various levels of tour operators. There are some very successful tour operators in the Northwest Territories who cater to high-end customers, and there are low-end-tourist-cater operators who look after the lower end. They don't have access to these types of capital assets where they can have their own facilities along the Ingraham Trail.

Due to safety reasons, as I have said, we have piloted this project to try to get these people off the highway. We have worked closely with my other department of Infrastructure to get the pole-off out there at Prelude Lake to open up other opportunities for operators. I have said in this House a number of times that we are victims of our own success for the number of people who are coming here. We have to continue to work with all operators no matter what their stature is and the customers that they have, high-end or low-end, and continue to make sure it is a safe environment for everybody. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Vanthuyne.

MR. VANTHUYNE: Thank you, Mr. Chair. I certainly appreciate the Minister sharing that insight. I know that highway safety was one of the major concerns. I have brought highway safety to the Minister's attention a number of times in a variety of forms, not just tourists. The primary, let's call it, concern with tourists on the highway wasn't necessarily the operators per se, because the operators were experienced enough and have been experienced enough to go to day-use areas and pull off on the highway. They would go to our existing parks like Yellowknife River, Madeline Lake, or Pontoon, that sort of thing.

The safety concern was individual tourists who would rent cars and drive down the highway and park right on the highway. That would suggest to me that maybe we need better communications in the rental vehicles and maybe better signage along the highway that indicates that you can't park on the highway. I am not trying to discourage the Minister in his previous comments with regard to safety on the highway. We all take it very seriously.

I would almost look at this as an opportunity to motivate some of the tour operators to reach out to our Department of Lands and give some consideration to looking at some leases, not recreational, but commercial leases, because we are still issuing commercial leases. Even though the land-use planning is kind of in a holding pattern, we are still issuing commercial leases, according to the Minister of Lands. Maybe not recreational ones, but commercial ones, we are. That would then only be, again, a bit of a monthly rate. It wouldn't necessarily be something overly expensive. It would be the beginning of them making a longer-term commitment and investment to the territory.

The concern is that some of these older operators do have significant investment in assets and in land and in buildings and having to get insurance and protect their liabilities, et cetera. Now, it is being seen by them, and even others, that the government, through taxpayer subsidy, is letting tour operators, sometimes not even Northern tour operators, use our territorial parks as a base to run their operations at a very low rate.

I just continue to share that concern. I know we are committed to the pilot project, but I would really like the government to pay attention to these concerns. Please continue to monitor, of course, the program and how well it might be doing, and measure it in a way so that, in next year's business plans, we can report back accordingly. That is it. That is all I have with regard to that particular aspect.

I am going to move on just for a moment. One of the other concerns, and I raised it briefly in my Member's statement the other day, was a good problem to have, the ever-growing number of tour operators who are applying for permits here in the North year over year. What is the department's sense on the rate at which this growth is taking place? Is there any reason to be concerned or alarmed at this point in terms of how many tour operators in this region are starting to move into the market? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. Thank you to the Member for that question. Just some information on the tourism operating licences; we had 110 in 2014, and we now have 145 in 2018. That is overall. We have seen the largest increase, as the Member has mentioned, in the North Slave region, where it went from 41 to 68 over a five-year period. There has been some growth, but I am not sure it is to the extent that maybe the optics are on the number of increases of the actual operating licences. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Mr. Vanthuyne.

MR. VANTHUYNE: All right. That is kind of good news to hear because then what that tells me is: when I physically see growth happening, then it is a
lot of the current licence holders who are actually expanding their businesses, which is a positive. I know NWT Tourism already does good work in this area. I am going to probably touch on this in a moment. Would there ever come a time where we have a number in mind that we might have to put a cap on the North Slave region and look at trying to promote getting, in particular, aurora tourism operators out into some of the other regions so that the benefits of this growth can be had by some of the other outlying regions?

I just want to quickly share one story, because I know I am limited on time here. The Standing Committee on Economic Development and Environment held our strategic planning meetings up in Norman Wells this summer, and every second person that I ran into asked me, “How can we get our hands on some of that Yellowknife tourism boom that is going on?” That is why I raise the question. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. Just to respond to a few of those questions: yes, we do work quite closely with NWT Tourism. I think that the approach that we have taken, and I think industry has also taken, is that it is a free market, and the idea of actually not limiting opportunities for people to enter or to grow their business within tourism is important. I agree that it is about having the strategy to have many of our tourists go beyond the North Slave region into the other regions. A few of the things that we are working on with NWT Tourism is each of the regions is developing regional tourism plans. As well, we have over $1.4 million of tourism development products, which is actually distributed throughout the five regions based on applications.

Northwest Territories Tourism has just recently released its marketing strategy with the idea of actually promoting the whole Northwest Territories. I believe that all of the elements are there in order to have product across the Northwest Territories, and I think that the heavy use of social media and using influencers and doing familiarization tours would bode well to letting more people know about many of the products across the Northwest Territories. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Next on the list, we have Mr. McNeely.

MR. MCNEELY: Thank you, Mr. Chair. Related to this activity, on the tourism side, as mentioned in my statement earlier today, it is a vibrant sector doing quite well, supported by various programs and marketing with the department. I compliment the department for their various initiatives and attendances. Looking at the Minister’s opening remarks, on the second page, there was a note toward advancing the federal transfer of the proposed Doi Toh Park. I know that there is a committee in place. I will respect the committee, which is represented by the Tulita District Land Corporation, and they have held a number of meetings.

My only question on this is: knowing that the second summer of cleanup activity is coming up from an RFP that was issued here a couple of years ago, after this last upcoming summer, is there going to be an audit done between the stakeholders for the Doi Toh Park as part of the statement on advancing work towards the federal transfer? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McNeely. Ms. St-Denis.

MS. ST-DENIS: Thank you very much. The regional office is working quite closely with the Doi Toh Territorial Park Corporation, and recently, they have been able to get some funding from INAC to do some strategic planning to actually update the CANOL Management Plan, the idea being that that would be a requirement under the land claim, and then it would get recommended to the Minister. At this point in time, we think that that is a critical element of understanding what that plan is and what the leadership is looking at wanting to do as far as moving forward with the project. We are quite keen to see where that project goes as far as advancing the CANOL Trail. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Mr. McNeely.

MR. MCNEELY: Thank you, Mr. Chair. If the department could keep me posted on the progress of that transfer, that will keep me in touch with both stakeholders. Thank you very much, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. McNeely. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. We will certainly commit to doing that. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Any further questions, Mr. McNeely?

MR. MCNEELY: Nothing further, Mr. Chair. Thank you.

CHAIRPERSON (Mr. Blake): Thank you. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Earlier when I wanted to ask some questions about planning studies for Yellowknife or a territorial visitor centre,
it was suggested that I ask them in this section. What can my friends tell me? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Minister Schumann.

HON. WALLY SCHUMANN: Yes, this is the section, yes. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. O'Reilly.

MR. O'REILLY: I know that I am all that stands between us and dinner, I guess. The only line item I can see in here with regard to support for Yellowknife tourism, per se, is on 220 under grants and contributions, Yellowknife visitor services, $161,000. Is there any other funding in the 2019-2020 budget to support the design or planning around a Yellowknife visitor centre or, indeed, a territorial visitor centre? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Ms. St-Denis.

MS. ST-DENIS: Thank you, Mr. Chair. Yes, the Member is correct. That is ongoing funding to assist the City of Yellowknife in providing visitor services. There is a longer-term plan that is being looked at. I believe the Member is asking about the actual previous visitor centre facility, and we are working closely with the Department of Infrastructure. They have temporarily stabilized that building, and they are monitoring it for movement, so the building is safe, although not occupiable at this time. They have recently gone out for expressions of interest on possible design opportunities. We are going to be working with them to see what the possible redevelopment approach might be for that building. Once again, it is a matter of understanding what the needs are for that building, whether it is amending the current structure and making some improvements, but once again, we are working with Infrastructure.

Sorry, the long answer to the Member’s question is that the funding in the budget is to maintain visitor services, but we would like the Member to know that there are discussions and work going on with the Department of Infrastructure on the facility itself. Thank you.

CHAIRPERSON (Mr. Blake): Thank you, Ms. St-Denis. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. That is helpful information. I guess I am wondering, though, about a bigger visitor centre, a better visitor centre for Yellowknife, and what the department is doing with the City or other interests to work towards a new visitor centre for Yellowknife, maybe a territorial visitor centre, as Whitehorse has for the Yukon. Is there any funding in the 2019-2020 budget for that kind of work? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Mr. Jensen.

MR. JENSEN: Thank you, Mr. Chair. No, there isn’t any dedicated funding in this budget for that purpose. I think that, building on what Ms. St-Denis was saying, right now the City of Yellowknife is taking the lead on the visitor services for Yellowknife. We continue to contribute our $161,000 a year for that.

If they are taking the lead on it, they are going to be doing some more work on planning. There is a possibility of looking at more of a visitor services tourism type of hub, but that is very much in the early days. There is nothing in the budget specifically dedicated towards looking at the territorial visitor centre.

I think the Minister was describing something more broadly, but there isn’t anything definitely in the budget for that. There is, perhaps, opportunity, if there was a need for further resources to continue this process, that they might be able to find something in the budget under grants and contributions for that. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Jensen. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Can someone tell me how much we are spending on the visitor centre in Dawson, Yukon? Thanks, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. O'Reilly. Mr. Jensen.

MR. JENSEN: Mr. Chair, the figure is $119,000. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Jensen. Mr. O'Reilly.

MR. O'REILLY: Thanks, Mr. Chair. Case made, thanks.

CHAIRPERSON (Mr. Blake): No further questions?

Okay. I will call the page. Industry, Tourism and Investment, tourism and parks, operation expenditure summary, $17,314,000. Does committee agree?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Agreed. Committee, we will continue after a short recess. Thank you.

---SHORT RECESS

CHAIRPERSON (Mr. Blake): Thank you, committee. We will continue. Okay, committee, we
are almost done. Information items on pages 222 to 226. Any questions, committee? Mr. Vanthuyne.

MR. VANTHUYNE: Mr. Chair, just correct me, page 222?

CHAIRPERSON (Mr. Blake): Yes, 222 to 226, information items. Mr. Vanthuyne.

MR. VANTHUYNE: Thanks again there, Mr. Chair. All I really want to ask here is: can the Minister provide us an update on the status of the review that was undertaken of BDIC with regard to the programs and the organizational and structural review? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. We have just received it, and we are in the process of reviewing it as we speak. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Vanthuyne.

MR. VANTHUYNE: How long does the Minister think it is going to take to go through the review process? Will the Standing Committee on Economic Development and Environment be a part of the process? How long until we are expecting to put out a public document to get an understanding of what next steps are going to be with the BDIC? Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Minister Schumann.

HON. WALLY SCHUMANN: Thank you, Mr. Chair. The plan going forward once we do this review is, one of the things that I am trying to do right now, we have been trying to set a date up so I can sit down with BDIC’s board and their chair to have a discussion around this. Then, once that is done, I am going to go to Cabinet with this document and then probably to standing committee.

Time frame-wise, I can't give you an exact date because we have been having a heck of a time here to try to get organized with the board, because they are from all over the Northwest Territories, to set up a time that we can meet. I am hoping that is going to happen within the next couple of weeks with them, at least. I suspect it is going to be a little bit tough to sit down with standing committee before the end of this session, so we are going to have to try to figure out, with you as the chair, and the timing, how we can make that work for you guys, as well. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Minister Schumann. Mr. Vanthuyne.

MR. VANTHUYNE: Okay. Well, thank you, Mr. Chair. We certainly look forward to seeing the next steps on that take place, and hopefully we can actually address the review in some way, shape, or form within the life of this Assembly. Thank you, Mr. Chair.

CHAIRPERSON (Mr. Blake): Thank you, Mr. Vanthuyne. Any further questions, committee? Seeing none, I will now return to the departmental summary found on page 203. I will call the page again. Industry, Tourism and Investment, Main Estimates 2019-2020, total department, $59,974,000. Any questions from committee? Are we agreed?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Thank you. Does committee agree that consideration of the Department of Industry, Tourism and Investment is concluded?

SOME HON. MEMBERS: Agreed.

CHAIRPERSON (Mr. Blake): Thank you. Thank you, Minister, and thanks to your witnesses for appearing before us. Sergeant-at-Arms, please escort the witnesses from the chamber. Thank you, committee. Mr. Testart, what is the wish of committee?

MR. TESTART: Thank you, Mr. Chair. I move the Chair rise and report progress. Thank you.

CHAIRPERSON (Mr. Blake): Thank you. A motion is on the floor to report progress. The motion is in order and is non-debatable. All those in favour? All those opposed? The motion is carried.

---Carried

I will now rise and report progress. Thank you.

DEPUTY SPEAKER: Can I get the report of the Committee of the Whole, Member for Mackenzie Delta?

Report of Committee of the Whole

MR. BLAKE: Mr. Speaker, your committee has been considering Bill 32, Naturopathic Profession Statutes Amendment Act, and Tabled Document 322-18(3), Main Estimates 2019-2020, and would like to report progress, and that Bill 32, Naturopathic Profession Statutes Amendment Act, is ready for a third reading. Mr. Speaker, I move that the report of the Committee of the Whole be concurred with. Thank you.

DEPUTY SPEAKER: Do we have a seconder? Member for Nahendeh. The motion is in order. All
those in favour? All those opposed? The motion is carried.

---Carried
