Housing Core Need Action Plan

My questions are for the Minister Responsible for the Housing Corporation. Her report on reducing core housing need, called *Towards Level Ground: Addressing Persistent Core Need in the Northwest Territories*, includes an action plan with spending of \$20 million in the next fiscal year, yet the Northwest Territories Housing Corporation operations and maintenance budget is decreasing next year. What is the source of the \$20 million required by the plan, and further:

1. How did the Minister decide to allocate spending among the 15 programs in the plan;
2. How do the commitments in the plan relate to each of the specific areas of core need;
3. How will the action plan spending be allocated among the regions; and
4. On what basis did the Minister decide to budget \$600,000 to address affordability problems as an element of core need in Yellowknife?
